Notes:

1. Asbestos disturbance, abatement, transportation, and disposal shall be performed in accordance with requirements of O.Reg. 278/05, O.Reg. 347/90, as amended, and TDGA.

2. All quantities, as provided, are approximations. Quantities, conditions, and locations of asbestos-containing materials are to be confirmed on-site by contractors prior to project bidding, removal or disturbance.

3. The survey did not include an intrusive, destructive investigation for concealed materials in every room. As a result, materials that may be present behind or above solid building material finishes are not included as part of the above database, unless otherwise stated.

4. DST was not granted access to the original survey that identified these materials. Therefore, the asbestos type and concentration is not available and DST has been instructed by PWGSC to rely on the data provided. See the Summary report for reference to most recent report containing this data.

Notes:

1. Asbestos disturbance, abatement, transportation, and disposal shall be performed in accordance with requirements of O.Reg. 278/05, O.Reg. 347/90, as amended, and TDGA.

2. All quantities, as provided, are approximations. Quantities, conditions, and locations of asbestos-containing materials are to be confirmed on-site by contractors prior to project bidding, removal or disturbance.

3. The survey did not include an intrusive, destructive investigation for concealed materials in every room. As a result, materials that may be present behind or above solid building material finishes are not included as part of the above database, unless otherwise stated.

4. DST was not granted access to the original survey that identified these materials. Therefore, the asbestos type and concentration is not available and DST has been instructed by PWGSC to rely on the data provided. See the Summary report for reference to most recent report containing this data.

Notes:

1. Asbestos disturbance, abatement, transportation, and disposal shall be performed in accordance with requirements of O.Reg. 278/05, O.Reg. 347/00, as amended, and TDGA.
2. All quantities, as provided, are approximations. Quantities, conditions, and locations of asbestos-containing materials are to be confirmed on-site by contractors prior to project bidding, removal or disturbance.
3. The survey did not include an intrusive, destructive investigation for concealed materials in every room. As a result, materials that may be present behind or above solid building material finishes are not included as part of the above database, unless otherwise stated.
5. DST was not granted access to the original survey that identified these materials. Therefore, the asbestos type and concentration is not available and DST has been instructed by PWGSC to rely on the data provided. See the Summary report for reference to most recent report containing this data.
6. As per the referenced 2014 Pinchin report provided by PWGSC, ceiling plaster in various locations throughout the building are considered asbestos-containing.
