Hayton, MOE, Environmental Monitoring & Reporting Branch, Sport Fish Contaminants Program). Concentrations shown were calculated from regressions of mercury concentration versus length.  $R^2$  values, N (number of fish analyzed) and other data associated with the calculated concentrations shown are provided in Table 32.

### Sport Fish Sampling Areas in the St. Lawrence River

- ① Thousand Islands - St. Lawrence River from east of Kingston to Brockville
- ② Brockville - St. Lawrence River from east of Brockville to Iroquois
- ③ Lake St. Lawrence - St. Lawrence River from east of Iroquois to Cornwall
- ④ Lake St. Francis - St. Lawrence River from east of Cornwall to Quebec border
