

-
- | | | |
|---|----|---|
| 1.1 Documents
<u>Required</u> | .1 | Maintain at job site, one copy each of the following:
.1 Fisheries Act Authorization Letter (to be provided by PWGSC);
.2 Contract drawings;
.3 Specifications;
.4 Addenda;
.5 Reviewed shop drawings/submissions;
.6 Change Orders;
.7 Other modifications to Contract;
.8 Field test reports;
.9 Copy of approved work schedule;
.10 Manufacturer's installation and application instructions. |
| 1.2 Site
<u>Conditions</u> | .1 | Records of existing geotechnical reports may be available for inspection at the offices of Public Works and Government Services Canada, 3 Queen Street, Charlottetown, PEI. This material is not necessarily up-to-date and is for information purposes only. It should be complemented with site visits and consultation with appropriate expertise. |
| 1.3 Work Schedule
and Completion
<u>Dates</u> | .1 | This project is to be completed by May 31st, 2016. |
| | .2 | Prepare and submit to the Departmental Representative with five (5) days of notification of Contract award, one (1) copy of the construction schedule, in the form of a bar chart, showing the dates for commencement and completion of each major activity of the work, including the work of subcontractors; dates of submissions, review and return of all drawings, etc.; the dates of Substantial Completion; and intended man hours of labour and equipment for each major items of work. If the schedule as submitted is unacceptable in any way, submit without delay a revised schedule satisfactory to the Departmental Representative. |
-

-
- .3 The Departmental Representative is to notify the Contractor in writing of acceptance of the Construction Schedule. Comply with the Construction Schedule at all times. If, for any reason the Construction Schedule is not followed, immediately notify the Departmental Representative of the changes and submit a revised schedule for acceptance. Upon written acceptance by the Departmental Representative, this schedule will become the Construction Schedule. **Work must be 60% complete by March 31st, 2016**
- .4 Whenever required, give further written particulars concerning this schedule. The submission to and acceptance by the Departmental Representative of the Contractor's Construction Schedule or the furnishing of details and particulars thereto will not relieve the Contractor of any duties and responsibilities under the Contract.
- 1.4 Measurement Responsibilities
- .1 Notify Departmental Representative sufficiently in advance of operations to permit required measurements for payment purposes.
- 1.5 Contractor's Use of Site
- .1 This Site will be partially occupied by the Owner. Cooperate with Northumberland Ferries Ltd. and ferry personnel. All work taking place will be coordinated and agreed to so that there will be minimal impact to the daily ongoing activities of the harbour.
- .2 Allow terminal staff to access dolphin pier headblock and the south copewall of centre pier.
- .3 Should interferences occur, take directions from Departmental Representative.
-

-
- .4 Do not unreasonably encumber site with materials or equipment.
 - .5 Move stored products or equipment which interfere with operations of Departmental Representative or other Contractors.
 - .6 Obtain and pay for use of additional storage or work areas needed for operations.
 - .7 Comply with all regulations and authorities having jurisdiction over the work, whether on land or on water.
 - .8 Do not allow damage to occur to existing structures as a result of operations. Repair any said damage at no additional expense to the Contract.
 - .9 Provide temporary barriers and warning signs in locations where work is adjacent to areas used by public or ferry personnel.
 - .10 Cooperate with the Ferry Operator and the users of the existing facilities. All work taking place will be coordinated and agreed to so that there will be a minimum impact to the ongoing operations of the ferry system.
- 1.6 Codes and Standards
- .1 Perform work in accordance with National Building Code of Canada (NBC) and any other code of provincial or local application provided that in any case of conflict or discrepancy, the more stringent requirements will apply.
 - .2 Meet or exceed requirements of specified standards, codes and referenced documents. When a standard or code is outdated, the latest edition will supersede the referenced date.
-

-
- .3 Observe and enforce construction safety measures by Canadian Construction Safety Code and Construction Safety Code of Prince Edward Island. In the event of conflict between any provisions of above authorities, the most stringent provision will apply.
- 1.7 Project Meeting .1 Departmental Representative will arrange project meetings and assume responsibility for setting times and recording and distributing minutes.
- 1.8 Setting Out of Work .1 Do all detail surveys necessary for the work, including locating and maintaining working points, and establishing lines and elevations. Perform all layout work, and carefully preserve benchmarks, reference points and stakes.
- .2 Provide such masts, scaffolds, batter boards, lines, straight edges, templates and other devices as may be necessary to facilitate layout, construction and inspection of the work. Whenever necessary, suspend work for such reasonable time as may be necessary to permit the Departmental Representative to check or inspect any portion of the work. The contractor will not be allowed any extra compensation or time for completion because of this suspension of work.
- .3 Elevations for the various features of the specified works to be referenced and properly related to a benchmark, which will be approved by the Departmental Representative.
- .4 Verify all grades, lines, levels, and dimensions shown on the drawings and report any errors or inconsistencies to the Departmental Representative before commencing work. Establish all grades,
-

lines, levels required to facilitate the work.

1.9 Contract
Documents

.1 Contract Drawings:

- .1 The drawings listed in these "Plans and Specifications" marked "A" and any additional drawings issued at a later date by the Departmental Representative.
- .2 Departmental Representative may furnish additional drawings to assist in proper execution of work. These drawings will be issued for clarification only. Such drawings will have same meaning and intent as if they were included with plans referred to in Contract Documents.
- .3 The drawings indicate the extent and general dimensions of the work. Make all necessary measurements to ensure that the result of the work is in accordance with the intent.
- .4 Verify all existing conditions in field prior to proceeding with work.

.2 Contract Specifications:

- .1 The general requirements and technical specifications are written solely for the General Contractor. They are organized into the NMS format of separate divisions and sections.
- .2 Specification language is the "Short Form Type", for example, where the word "provide" occurs, interpret it to mean "the Contractor shall furnish all labour, material and equipment necessary to complete the work".
- .3 These Specifications and accompanying drawings are intended to describe and provide for a finished project. They are intended to be complementary, and what is called for by either will be as

binding as if called for by both. The Contractor shall understand that the work herein described will be complete in every detail, notwithstanding that every item necessarily involved is not particularly mentioned, and Contractor will be held to provide all labour, materials and equipment necessary for the entire completion of the work and will not avail himself of any errors or omissions.

1.10 Permits and Regulations

- .1 Apply for, obtain and pay for all necessary permits, approvals and other authorizations required for the work.
- .2 Comply with all by-laws, ordinances and regulations of all authorities having jurisdiction.
- .3 Pay for any Municipal permits, per General Conditions "C".

1.11 Cutting, Fitting & Patching

- .1 Execute cutting (including excavation), fitting and patching required to make work fit properly.
- .2 Make cuts with clean, true, smooth edges. Make patched inconspicuous in final assembly.
- .3 Where new work connects with existing and where existing work is altered, cut, patch and make good to match existing work.
- .4 Obtain Departmental Representative's approval before cutting, boring or sleeving, or excavating adjacent to load-bearing members.

1.12 Record of Construction

- .1 As work progresses, maintain accurate records to show all deviations from the contract drawings, with particular reference to work which will be

concealed. Prior to the inspection of the work for the issuance of the Final Certificate of Completion, provide the Departmental Representative with one set of white prints of the drawings with all deviations shown neatly thereon.

- .2 Provide "as built" cross sections of any excavation, dredging or fill work.

1.13 Payment

- .1 Payment for all work under this contract to be according to the "Articles of Agreement".
- .2 No separate payment will be made for work specified under General Conditions, Supplementary Conditions or any sections of Specification under Division 01. The cost of this work is to be considered as overhead and to be included in the unit prices of the Contract.
- .3 Dimensional changes are directed by the Departmental Representative to suit existing conditions, but not resulting in additional work or materials, will not be considered as extra to the Contract.

1.14 Site Examination

- .1 All parties tendering should visit the site of the work prior to submission of tenders and make themselves thoroughly acquainted with site conditions, conditions of existing objects to be removed, tides, degree of exposure and all information necessary for the proper carrying out of the work covered by the drawings and this Specification. Submission of Tender will be deemed that Contractor is conversant with site conditions.
- .2 The Departmental Representative will give no consideration whatsoever to any claim by the Contractor resulting from

Failure to have made all the necessary investigations prior to tendering.

- .3 Advise the Canadian Coast Guard, Marine Communication & Traffic Services (MCTS) Sydney at 902-564-7751 or toll free at 1-800-686-8676 sufficiently in advance of commencement of work or deploying or removing site markings in order to allow for appropriate notice to shipping/mariners.
 - .4 Any material or equipment used in construction will be marked in accordance to the "Collisions Regulations" of the Canadian Shipping Act 2001" when located in the waterway.
- 1.15 Maintenance of Shipping
- .1 Liaise with the local port officials to coordinate activities such that any interference is minimized.
- 1.16 Cooperation and Assistance to Departmental Representative
- .1 Co-operate with Departmental Representative on inspection of work.
 - .2 Provide assistance when requested.
 - .3 Provide small motor boat with operator for Departmental Representative's use when requested.
- 1.17 Datum
- .1 The datum referred to in this Specification is Chart Datum. Chart Datum is, by International Agreement a plan below which the time will seldom fall. The Canadian Hydrographic Service has adopted the plane of the lowest normal tide (L.N.T.) as Chart Datum. As the rise, fall and range of tides varies daily, the Canadian Tide and Current Tables, as issued by the Canadian Hydrographic Service, should be consulted for tidal predictions and other tidal information relating to work.

-
- | | | |
|---|----|---|
| 1.18 Contractor's
<u>Representative</u> | .1 | Continuously maintain on the site an authorized representative to whom communication may be addressed and who will be competent to speak for the Contractor in discussing work methods. |
| 1.19 Workers'
<u>Compensation</u> | .1 | Contractor and all sub-contractors must be registered under the Workers Compensation Act and provide evidence of good standing. |
| | .2 | At completion of Contract and before final payment is made, the Contractor will present to the Departmental Representative a Letter of Certification from the Workers Compensation Board, showing that all required assessments are paid in connection with all trades. |
| 1.20 Laws, Standards
<u>Taxes and Fees</u> | .1 | Comply with all laws and standards governing all or any part of the work, pay all applicable taxes and pay for all permits and certificates required in respect of the execution of the work. Where variances exist between the requirements of agencies governing all or any part of the work, the most restrictive will govern, but in no instance will the standards established by the drawings and this Specification, which exceed such requirements, be reduced. |
| 1.21 Protection and
<u>Repair</u> | .1 | Repair any damage resulting from operations under this contract. |
| 1.22 Location
<u>Fixtures</u> | .1 | Location of equipment, fixtures or any and of Equipment appurtenances indicated are to be considered approximate. |
| 1.23 Inspection
<u>and Testing</u> | .1 | The Departmental Representative may employ an Inspector and/or Testing Company to confirm work conforms with the specifications and drawings. |
| 1.24 Existing Soils | .1 | Any information pertaining to soils and |
-

Conditions

all boreholes logs are furnished by the Departmental Representative as a matter of general information only and borehole descriptions or logs are not to be interpreted as descriptive of conditions at locations other than those described by the boreholes themselves.

1.25 Relics and
Antiquities

- .1 Protect relics, antiquities, items of historical or scientific interest such as cornerstones and contents, commemorative plaques, inscribed tablets, and similar objects found during course of work.
- .2 Give immediate notice to Departmental Representative and await written instructions before proceeding with work in this area.
- .3 Relics, antiquities and items of historical or scientific interest remain Departmental Representative's property.

1.26 Temporary
Navigational Buoys

- .1 Maintain temporary navigation light to mark the position of the outer end of the structure as construction proceeds. Navigation light is to meet the requirements of Canadian Coast Guard Standard TP968 and be equipped with radar reflectors.
- .2 During construction, mark the construction area with yellow cautionary buoy(s) to be placed 20 m from the seaward end of construction area in order to identify the location of ongoing work and will carry the following:
 - a) Radar reflector
 - b) 2nm amber light displaying characteristics (F1) 4S from dusk to dawn and during periods of reduced visibility.

- .3 Coordinate the navigation light installation with the local Harbour Authority.
- .4 Cover all costs associated with the supply, installation and removal of all temporary navigation light.

PART 1 - GENERAL

1.1 Scope of Work

- .1 Mobilization of all material and equipment required to carry out the work including temporary water and power, etc.
- .2 Removal of ship to shore cabinet, power lines and concrete pads.
- .3 Removal and subsequent reinstatement of shelter and concrete pad as required to carry out the work.
- .4 Removal and reinstatement of existing water valve chamber.
- .5 Removal and disposal of existing bollard block ladders.
- .6 Removal and disposal of four (4) existing steel mooring bollards.
- .7 Saw cutting and removal of existing asphalt.
- .8 Excavation of existing fill adjacent to copewall and management of creosote coated timber debris as required.
- .9 Removal and disposal of a portion of the existing reinforced concrete copewall including electrical conduit/wiring, communication cables, bollard anchorage, light pole anchors, machine bolts and intentional roughing the horizontal surface that will contact the new concrete.
- .10 Removal and disposal of the existing granular fill material between the copewall and the existing repair SSP user.

- .11 Supply and installation of new lugs, support clips and anchor rod connector angle to the existing SSP wall.
- .12 Modify existing 50mm dia. anchor rod with new endplate.
- .13 Supply and installation of new reinforced concrete copewall and bollard base, including joints, formwork, new bollard anchors, electrical conduit, light pole anchors etc.
- .14 Supply and install three (3) new ladders at the bollard bases.
- .15 Supply and installation of three (3) new 35 tonne bollards.
- .16 Reinstall three (3) existing light pole standards.
- .17 Installation and compaction of existing fill material adjacent to the new copewall.
- .18 Supply, placement and compaction of new asphalt adjacent to the copewall.

1.2 List Of Drawings

.1	<u>Drawing No</u>	<u>Title</u>
	S01	Key Plan and Existing Layout
	S02	Copewall Removals and Repairs
	S03	Copewall Repair Sections and Details
	S04	Reinforcing & Typical Details

1.3 General

- .1 This section details the measurement method to be used for payment purposes. Incidental items covered in the various sections of the specification are to be

allowed for in the pricing of each pay item.

1.4 Measurement For
Payment

- .1 **Lump Sum Items: the following items are to be measured separately as Lump Sum items in the tender documents:**
- .1 Mobilization/Demobilization: Mobilization and demobilization including all contract requirements not specifically measured, will be paid as a Lump Sum item. Fifty percent (50%) of the allocation for mobilization and demobilization will be paid upon commencing the project and the remainder upon completion of the Project.
 - .2 Accommodate Existing Services (Electrical Power and Water Supply): will be measured for payment by the lump sum. This item includes all coordination with and assistance to the affected utilities including all material and labour to supply and install temporary means of water and electricity to work area throughout duration of Project.
 - .3 Miscellaneous Removals and Reinstatements: will be measured by the lump sum. This item includes excavation and/or saw cutting as required, removal, stockpiling, protection on-site and reinstatement of transformer, wiring, conduit, shelter, pipe bollards, water valve chamber and concrete pads including reinforcement where indicated on the Project Drawings.
 - .4 Removal of Shore Power and Concrete Pads: will be measured by the lump sum. This item includes the excavation and/or saw cutting as required, stockpiling and protection of shore power equipment

including but not limited to receptacles and panel as well as the removal and off-site disposal of the existing concrete pad and reinforcement. Relocation, reinstallation and reconnection of the shore power assembly will be done in a separate contract by others.

.2 Unit Price Items: the following outlines the unit of measurement of the unit price items as indicated in the tender documents:

- .1 Excavation and Backfilling:**
excavation and backfilling will be paid for by the cubic metre. This item includes all labour and material required to excavate all materials encountered and to use suitable material for backfill where shown on the Project Drawings. This item also includes the handling of impacted soils. If creosote timbers are encountered during excavation, they will be disposed of at an approved facility and paid for via an approved change order.
- .2 Concrete Removals (Copewall and Bollard Bases):** this item will be measured by the cubic metre. This item includes excavation and/or saw cutting as required, removal and offsite disposal of concrete copewall, bollard bases including reinforcement, bollards, gravel infill between the SSP wall and copewall, bollard anchors, bollard block, ladders, machine bolts, communication cables and light pole anchors where indicated on the Project Drawings. This item also includes intentional roughing of the existing concrete as shown on the Project Drawings.

- .3 Supply and Install New Concrete Copewall: this item will be measured by the cubic metre. This item includes the supply and installation of new concrete copewall complete with miscellaneous embedded steel, support clips, modifications to the existing 50mm tie rod, joints as well as anchorage into existing concrete and reinforcement.
- .4 Supply and Install New Concrete Bollard Bases: this item will be measured by the cubic metre. This item includes the supply and installation of new concrete bollard bases where and as shown on the Project Drawings.
- .5 Supply and Install New Ladders for Bollard Bases: this item will be measured by the number installed in the Works. This item includes the supply and installation of new galvanized ladders. Bolts and hardware will not be measured, but considered incidental to the work.
- .6 Supply and Install New 35 Tonne Bollards (Incl. Anchorage): this item will be measured by the number installed in the Works. This item includes the supply and installation of new 35 tonne bollards complete with fixing hardware, grout and paint.
- .7 Remove and Reinstall Light Standards (Incl. Conduit): this item will be measured by the number removed and reinstated in the Works. This item includes the removal, stockpiling and protection of existing poles, luminaries fittings stub ups and wiring and the re-installation of the complete light standard where indicated by the Project Drawings. This item

also includes the supply and
installation of new conduits.

- .8 Asphalt Resurfacing: this item will
be measured by the square metre.
This item includes saw cutting and
planing of existing asphalt as well
as the supply, placement and
compaction of granular bedding
material and asphalt.

-
- | | | | |
|---|---------------------------|----|---|
| 1 | <u>General</u> | .1 | Submit to Departmental Representative, for review, shop drawings, product data, samples and other information specified. |
| | | .2 | Until submission is reviewed, work involving relevant product may not proceed. |
| 2 | <u>Shop Drawings</u> | .1 | Drawings to be originals prepared by contractor, subcontractor, supplier or distributor, which illustrate appropriate portion of work, showing fabrication, layout, setting or erection details as specified in appropriate sections. |
| | | .2 | Identify details by reference to sheet and detail numbers shown on Project Drawings. |
| | | .3 | Maximum sheet size 860mm X 1120 mm. |
| 3 | <u>Product Data</u> | .1 | Certain specification sections specify that manufacturer's standard schematic drawings, catalogue sheets, diagrams schedules, performance chart, illustrations and other standard descriptive data will be accepted in lieu of shop drawings. |
| 4 | <u>Samples</u> | .1 | Submit samples in sizes and quantities specified. |
| | | .2 | Construct field samples and mock-ups at locations acceptable to Departmental Representative. |
| | | .3 | Accepted samples will become standards of workmanship and material against which, installed work will be checked on project. |
| 5 | <u>Miscellaneous Data</u> | .1 | Provide certificates, methodologies, design and test results as required. |
-

-
- | | | |
|---|--|--|
| 6 | <u>Coordination
of Submissions</u> | <ul style="list-style-type: none">.1 Review shop drawings, product data, samples and miscellaneous data prior to submissions..2 Verify:<ul style="list-style-type: none">.1 Field Measurements..2 Field Construction Criteria..3 Catalogue numbers and similar data..3 Coordinate each submission with requirements of work and contract documents. Individual submissions will not be reviewed until all related information is available..4 Contractor's responsibility for errors and omissions in submission is not relieved by Departmental Representative's review of submissions..5 Contractor's responsibility for deviations in submission from requirements in Contract documents is not relieved by Departmental Representative's review of submission, unless Departmental Representative gives written acceptance of specified deviations..6 Notify Departmental Representative, in writing at time of submission, of deviations from requirements of contract documents stating reasons for deviations..7 After Departmental Representative's review, distribute copies. |
| 7 | <u>Submission
Requirements</u> | <ul style="list-style-type: none">.1 Schedule submissions at least 14 days before dates reviewed submissions will be needed. |
-

-
- .2 Submit number of opaque diazo copies of shop drawings, product data which Contractor requires for distribution, plus two (2) copies which will be retained by Departmental Representative.
 - .3 Accompany submissions with transmittal letter, in duplicate, containing:
 - .1 Date.
 - .2 Project title and number.
 - .3 Contractor's name and address.
 - .4 Identification and quantity of each shop drawing, product data and sample submitted.
 - .5 Other pertinent data.
 - .4 Submissions to include:
 - .1 Date and revision dates.
 - .2 Project title and number.
 - .3 Name and address of:
 - .1 Subcontractor.
 - .2 Supplier.
 - .3 Manufacturer.
 - .4 Separate details when pertinent.
 - .4 Identification of product or material.
 - .5 Relation to adjacent structure or materials.
 - .6 Field dimensions, clearly identified as such.
 - .7 Specification Section Number.
 - .8 Applicable standards such as CSA or CGSB numbers.
 - .9 Contractor's stamp, initialed or signed, certifying review of submission, verification of field measurements and compliance with contract documents.
-
- | | | |
|---|--------------------------------|---|
| 8 | Shop Drawings
<u>Review</u> | .1 The review of shop drawings by Public Works and Government Services Canada or its authorized consultant, is for the sole purpose of ascertaining conformance with the general concept. This review |
|---|--------------------------------|---|
-

does not mean that Public Works and Government Services Canada approves the detail design inherent in the shop drawings, responsibility for which remains with the Contractor submitting same, and such review shall not relieve the Contractor of responsibility for errors or omissions in the shop drawings or of responsibility for meeting all requirements of the construction and contract documents. Without restricting the generality of the foregoing, the Contractor is responsible for dimensions to be confirmed and correlated at the job site, for information that pertains solely to fabrication processes or to techniques of construction and installation and for co-ordination of the work of all sub-trades.

- 9 Other Reviews .1 As for shop drawings above, other reviews are for the sole purpose of ascertaining the general concept.

-
- | | | | |
|-----|---------------------------------|----|---|
| 1.1 | <u>Section Includes</u> | .1 | Fire Safety Requirements. |
| | | .2 | Hot Work Permit. |
| | | .3 | Existing Fire Protection and Alarm Systems. |
| 1.2 | <u>Related Sections</u> | .1 | Section 01 35 29: Health and Safety Requirements. |
| 1.3 | <u>References</u> | .1 | National Fire Code 2010 |
| | | .2 | National Building Code 2010 |
| 1.4 | <u>Definitions</u> | .1 | Hot Work defined as:
.1 Welding work.
.2 Cutting of materials by use of torch or other open flame devices.
.3 Grinding with equipment which produces sparks.
.4 Use of open flame torches such as for roofing work. |
| 1.5 | <u>Submittals</u> | .1 | Submit copy of Hot Work Procedures and sample of Hot Work permit to Departmental Representative for review, within 14 calendar days of acceptance of bid. |
| | | .2 | Submit in accordance with section 01 33 00. |
| 1.6 | <u>Fire Safety Requirements</u> | .1 | Implement and follow fire safety measures during Work. Comply with following:
.1 National Fire Code 2010.
.2 National Building Code 2010.
.3 Federal and Provincial Occupational Health and Safety Acts and Regulations. |
| | | .2 | In event of conflict between any provisions of above authorities the most stringent provision will apply. Should a dispute arise in determining the most stringent requirement, the Departmental Representative will advise on the course |
-

of action to be followed.

1.7 Hot Work
Authorization

- .1 Obtain the Departmental Representative's written "Authorization to Proceed" before conducting any form of Hot Work on site.
- .2 To obtain authorization submit to the Departmental Representative:
 - .1 Contractor's typewritten Hot Work Procedures to be followed on site as specified below.
 - .2 Description of the type and frequency of Hot Work required.
 - .3 Sample Hot Work Permit to be used.
- .3 Upon review and confirmation that effective fire safety measures will be implemented and followed during performance of hot work, the Departmental Representative will give authorization to proceed as follows:
 - .1 Issue one written "Authorization to Proceed" covering the entire project for duration of work or;
 - .2 Subdivide the work into pre-determined, individual activities, each activity requiring a separately written authorization to proceed.
- .4 Requirement for individual authorization will be based on:
 - .1 Nature or phasing of work;
 - .2 Risk to Facility operations;
 - .3 Quantity of various trades needing to perform hot work on project or;
 - .4 Other situation deemed necessary by the Departmental Representative to ensure fire safety on premises.
- .5 Do not perform any Hot Work until receipt of the Departmental Representative's written "Authorization to Proceed" for that portion of work.
- .6 In tenant occupied Facility, coordinate

performance of Hot Work with Facility Manager through the Departmental Representative. When directed, perform Hot Work only during non-operative hours of the Facility. Follow the Departmental Representative's directives in this regard.

1.8 Hot Work
Procedures

- .1 Develop and implement safety procedures and work practices to be followed during the performance of Hot Work.
- .2 Hot Work Procedures to include:
 - .1 Requirement to perform hazard assessment of site and immediate work area beforehand for each hot work event in accordance with Safety Plan specified in section 01 35 29.
 - .2 Use of a Hot Work Permit system with individually issued permit by Contractor's Superintendent to worker or subcontractor granting permission to proceed with Hot Work.
 - .3 Permit required for each Hot Work event.
 - .4 Designation of a person on site as a Fire Safety Watcher responsible to conduct a fire safety watch for a minimum duration of 30-60 minutes immediately following the completion of the Hot Work.
 - .5 Compliance with fire safety codes, standards and occupational health and safety regulations specified.
 - .6 Site specific rules and procedures in force at the site as provided by the Facility Manager.
- .3 Generic procedures, if used, must be edited and supplemented with pertinent information tailored to reflect specific project conditions. Label document as being the Hot Work Procedures for this contract.
- .4 Procedures shall clearly establish

responsibilities of:

- .1 Worker performing hot work,
- .2 Person issuing the Hot Work Permit,
- .3 Fire Safety Watcher,
- .4 Subcontractor(s) and Contractor.

- .5 Brief all workers and subcontractors on Hot Work Procedures and of Permit system. Stringently enforce compliance.

1.9 Hot Work Permit

- .1 Hot Work Permit to include the following:
 - .1 Project name and project number;
 - .2 Building name and specific room or area where hot work will be performed;
 - .3 Date of issue;
 - .4 Description of hot work type needed;
 - .5 Special precautions to be followed, including type of fire extinguisher needed;
 - .6 Name and signature of permit issuer.
 - .7 Name of worker to which the permit is issued.
 - .8 Permit validity period not to exceed 8 hours. Indicate start time/date and termination time/date.
 - .9 Worker's signature with time/date of hot work completion.
 - .10 Stipulated time period of safety watch.
 - .11 Fire Safety Watcher's signature with time/date.
- .2 Permit to be typewritten form. Industry Standard forms shall only be used if all data specified above is included on form.
- .3 Each Hot Work Permit to be completed in full, signed and returned to Contractor's Superintendent for safe keeping on site.

1.10 Fire Protection
And Alarm Systems

- .1 Fire protection and alarm systems shall not be:
 - .1 Obstructed.
 - .2 Shut-off, unless approved by Departmental Representative.

- .3 Left inactive at the end of a working day or shift.
 - .2 Do not use fire hydrants, standpipes and hose systems for purposes other than firefighting.
 - .3 Costs incurred, from the fire department, Facility owner [and tenants], resulting from negligently setting off false alarms will be charged to the Contractor in the form of financial progress payment reductions and holdback assessments against the Contract.
- 1.11 Documents On Site
 - .1 Keep Hot Work Permits and Hazard assessment documentation on site for duration of Work.
 - .2 Upon request, make available to Departmental Representative or to authorized safety representative for inspection.

-
- | | | | |
|------|-------------------------|----|---|
| 1.1 | <u>Section Includes</u> | .1 | Procedures to isolate and lockout electrical facility and other equipment from energy sources. |
|
 | | | |
| 1.2 | <u>Related Sections</u> | .1 | Section 01 35 29: Health and Safety. |
|
 | | | |
| 1.3 | <u>References</u> | .1 | CSA C22.1-15, Canadian Electrical Code, Part 1, Safety Standard for Electrical Installations. |
| | | .2 | CAN/CSA-C22.3 No.1-15, Overhead Systems. |
| | | .3 | CSA C22.3 No.7-15, Underground Systems. |
| | | .4 | COSH: Canada Occupational Health and Safety Regulations made under Part II of the Canada Labour Code. |
|
 | | | |
| 1.4 | <u>Definitions</u> | .1 | Electrical Facility: means any system, equipment, device, apparatus, wiring, conductor, assembly or part thereof that is used for the generation, transformation, transmission, distribution, storage, control, measurement or utilization of electrical energy, and that has an amperage and voltage that is dangerous to persons. |
| | | .2 | Guarantee of Isolation: means a guarantee by a competent person in control or in charge that a particular facility or equipment has been isolated. |
| | | .3 | De-energize: in the electrical sense, that a piece of equipment is isolated and grounded, e.g. if the equipment is not grounded, it cannot be considered de-energized (DEAD). |
| | | .4 | Guarded: means that an equipment or facility is covered, shielded, fenced, enclosed, inaccessible by location, or otherwise protected in a manner that, to the extent that is reasonably practicable, |
-

will prevent or reduce danger to any person who might touch or go near such item.

.5 Isolate: means that an electrical facility, mechanical equipment or machinery is separated or disconnected from every source of electrical, mechanical, hydraulic, pneumatic or other kind of energy that is capable of making it dangerous.

.6 Live/alive: means that an electrical facility produces, contains, stores or is electrically connected to a source of alternating or direct current of an amperage and voltage that is dangerous or contains any hydraulic, pneumatic or other kind of energy that is capable of making the facility dangerous to persons.

1.5 Compliance Requirements

.1 Comply with the following in regards to isolation and lockout of electrical facilities and equipment:

.1 Canadian Electrical Code.

.2 Federal and Provincial Occupational Health and Safety Acts and Regulations.

.3 Regulations and code of practise as applicable to mechanical equipment or other machinery being de-energized.

.4 Procedures specified herein.

.2 In event of conflict between any provisions of above authorities the most stringent provision will apply.

1.6 Submittals

.1 Submit copy of lockout procedures, sample of lockout permit and lockout tags proposed for use in accordance with Section 01 33 00. Submit within 14 calendar days of acceptance of bid.

1.7 Isolation Of Existing Services

.1 Obtain the Departmental Representative's written authorization prior to working on existing live or active electrical

facilities and equipment and before proceeding with isolation of such item.

- .2 To obtain authorization, submit to the Departmental Representative the following documentation:
 - .1 Written request to isolate the particular service or facility and;
 - .2 Copy of Contractor's Lockout Procedures.
 - .3 Make a Request for Isolation for each event, unless directed otherwise by the Departmental Representative, as follows:
 - .1 Fill-out standard form in current use at the Facility as provided by Departmental Representative or;
 - .2 Where no form exist, make written request indicating:
 - .1 The equipment, system or service to be isolated and its location;
 - .2 Duration of isolation period (ie: start time & date and completion time & date).
 - .3 Voltage of service feed to system or equipment being isolated.
 - .4 Name of person making the request.
 - .4 Do not proceed with isolation until receipt of written notification from Departmental Representative granting the Isolation Request and authorizing to proceed with the work.
 - .1 Note that Departmental Representative may designate another person at the Facility being authorized to grant the Isolation Request.
 - .5 Conduct safe, orderly shutdown of equipment or facility. De-energize, isolate and lockout power and other sources of energy feeding the equipment or facility.
-

- .6 Determine in advance, as much as possible, in cooperation with the Departmental Representative, the type and frequency of situations which will require isolation of existing services.
- .7 Plan and schedule shut down of existing services in consultation with the Departmental Representative and the Facility Manager. Minimize impact and downtime of Facility operations. Follow Departmental Representative's directives in this regard.
- .8 Conduct hazard assessment as part of the process in accordance with health and safety requirements specified Section 01 35 29.

1.8 Lockouts

- .1 De-energize, isolate and lockout electrical facility, mechanical equipment and machinery from all potential sources of energy prior to working on such items.
 - .2 Develop and implement clear and specific lockout procedures to be followed as part of the Work.
 - .3 Prepare typed written Lockout Procedures describing safe work practices, procedures, worker responsibilities and sequence of activities to be followed on site by workforce to safely isolate an active piece of equipment or electrical facility and effectively lockout and tagout it's sources of energy.
 - .4 Include as part of the Lockout Procedures a system of lockout permits managed by Contractor's Superintendent or other qualified person designated by him/her as being "in-charge" at the site.
 - .1 A lockout permit shall be issued to specific worker providing a Guarantee of
-

Isolation before each event when work must be performed on a live equipment or electrical facility.

.2 Duties of person managing the permit system to include:

.1 Issuance of permits and lockout tags to workers.

.2 Determining permit duration.

.3 Maintaining record of permits and tags issued.

.4 Making a Request for Isolation to Departmental Representative when required as specified above.

.5 Designating a Safety Watcher, when one is required based on type of work.

.6 Ensuring equipment or facility has been properly isolated.

.7 Collecting and safekeeping lockout tags returned by workers as a record of the event.

.5 Clearly establish, describe and allocate responsibilities of:

.1 Workers.

.2 Person managing the lockout permit system.

.3 Safety Watcher.

.4 Subcontractor(s) and General Contractor.

.6 Generic procedures, if used, must be edited and supplemented with pertinent information to reflect specific project requirements.

.1 Incorporate site specific rules and procedures in force at site as provided by Facility Manager through the Departmental Representative.

.2 Clearly label the document as being the Lockout procedures applicable to work of this contract.

.7 Use energy isolation lockout devices specifically designed and appropriate for

type of facility or equipment being locked out.

.8 Use industry standard lockout tags.

.9 Provide appropriate safety grounding and guards as required.

1.9 Conformance

.1 Brief all workers and subcontractors on requirements of this section. Stringently enforce use and compliance.

1.10 Documents On
Site

.1 Post Lockout Procedures on site in common location for viewing by workers.

.2 Keep copies of Request for Isolation forms and lockout permits and tags issued to workers on site for full duration of Work.

.3 Upon request, make available to the Departmental Representative or to authorized safety representative for inspection.

-
- 1.1 Related Sections
- .1 Section 01 35 24: Special Procedures on Fire Safety Requirements.
 - .2 Section 01 35 25: Special Procedures on Lockout Requirements.
- 1.2 Definitions
- .1 COSH: Canada Occupational Health and Safety Regulations made under Part II of the Canada Labour Code.
 - .2 Competent Person: means a person who is:
 - .1 Qualified by virtue of personal knowledge, training and experience to perform assigned work in a manner that will ensure the health and safety of persons in the workplace, and;
 - .2 Knowledgeable about the provisions of occupational health and safety statutes and regulations that apply to the Work and;
 - .3 Knowledgeable about potential or actual danger to health or safety associated with the Work.
 - .3 Medical Aid Injury: any minor injury for which medical treatment was provided and the cost of which is covered by Workers' Compensation Board of the province in which the injury was incurred.
 - .4 PPE: personal protective equipment.
 - .5 Work Site: where used in this section shall mean areas, located at the premises where Work is undertaken, used by Contractor to perform all of the activities associated with the performance of the Work.
- 1.3 Submittals
- .1 Make submittals in accordance with Section 01 33 00.
 - .2 Submit site-specific Health and Safety Plan prior to commencement of Work.
 - .1 Submit within five (5) work days of
-

notification of Bid Acceptance. Allow for 5-10 days for Department review and recommendations prior to the commencement of work. Provide three (3) copies.

.2 Departmental Representative will review Health and Safety Plan and provide comments.

.3 Revise the Plan as appropriate and resubmit within five (5) work days after receipt of comments.

.4 Departmental Representative's review and comments made of the Plan shall not be construed as an endorsement, approval or implied warranty of any kind by Canada and does not reduce Contractor's overall responsibility for Occupational Health and Safety of the Work.

.5 Submit revisions and updates made to the Plan during the course of Work.

.3 Submit name of designated Health and Safety Site Representative and support documentation specified in the Safety Plan.

.4 Submit building permit, compliance certificates and other permits obtained.

.5 Submit copy of Letter in Good Standing from Provincial Workers Compensation or other Department of Labour organization.

.1 Submit update of Letter of Good Standing whenever expiration date occurs during the period of Work.

.6 Submit copies of reports or directions issued by Federal, Provincial and Territorial health and safety inspectors.

.7 Submit copies of incident reports.

.8 Submit WHMIS MSDS - Material Safety Data Sheets.

- 1.4 Compliance
Requirements
- .1 Comply with Occupational Health and Safety Act for Province of Prince Edward Island, and Occupational Health and Safety Regulations made pursuant to the Act.
 - .2 Comply with Canada Labour Code - Part II (entitled Occupational Health and Safety) and the Canada Occupational Health and Safety Regulations as well as any other regulations made pursuant to the Act.
 - .1 The Canada Labour Code can be viewed at: [www.http://laws-lois.justice.gc.ca/eng/acts/L-2/fulltext.html](http://laws-lois.justice.gc.ca/eng/acts/L-2/fulltext.html).

 - .3 A copy may be obtained at: Canadian Government Publishing Public Works & Government Services Canada Ottawa, Ontario, K1A 0S9 Tel: 819-956-4800 or 1-800-635-7943 Publication No. L31-85/2000 (E or F).
 - .3 Treasury Board of Canada Secretariat (TBS):
 - .1 Treasury Board, Fire Protection Standard April 1, 2010 www.tbs-sct.gc.ca/pol/doc-eng.aspx?id=17316§ion=text.
 - .4 Canadian Standards Association (CSA):
 - .1 CSA S350-M1980(R2003), Code of Practice for Safety in Demolition of Structures.
 - .5 Observe construction safety measures of:
 - .1 NBC 2010, Division B, Part 8.
 - .2 Municipal by-laws and ordinances.
 - .6 In case of conflict or discrepancy between above specified requirements, the more stringent shall apply.

- .7 Maintain Workers Compensation Coverage in good standing for duration of Contract. Provide proof of clearance through submission of Letter in Good Standing.
- .8 Medical Surveillance: Where prescribed by legislation or regulation, obtain and maintain worker medical surveillance documentation.
- 1.5 Responsibility
 - .1 Be responsible for health and safety of persons on site, safety of property on site and for protection of persons and environment adjacent to the site to extent that they may be affected by conduct of Work.
 - .2 Comply with and enforce compliance by all workers, sub-contractors and other persons granted access to Work Site with safety requirements of Contract Documents, applicable federal, provincial, and local by-laws, regulations, and ordinances, and with site-specific Health and Safety Plan.
- 1.6 Site Control and Access
 - .1 Control the Work and entry points to Work Site. Approve and grant access only to workers and authorized persons. Immediately stop and remove non-authorized persons.
 - .1 Departmental Representative will provide names of those persons authorized by Departmental Representative to enter onto Work Site and will ensure that such authorized persons have the required knowledge and training on Health and Safety pertinent to their reason for being at the site, however, Contractor remains responsible for the health and safety of authorized persons while at the Work Site.
 - .2 Isolate Work Site from other areas of the premises by use of appropriate means.

.1 Erect fences, hoarding, barricades and temporary lighting as required to effectively delineate the Work Site, stop non-authorized entry, and to protect pedestrians and vehicular traffic around and adjacent to the Work and create a safe environment. See Section 01 51 00 for minimum acceptable requirements.

.2 Post signage at entry points and other strategic locations indicating restricted access and conditions for access.

.3 Use professionally made signs with bilingual message in the 2 official languages or international known graphic symbols.

.3 Provide safety orientation session to persons granted access to Work Site. Advise of hazards and safety rules to be observed while on site.

.4 Ensure persons granted site access wear appropriate PPE. Supply PPE to inspection authorities who require access to conduct tests or perform inspections.

.5 Secure Work Site against entry when inactive or unoccupied and to protect persons against harm. Provide security guard where adequate protection cannot be achieved by other means.

1.7 Protection

.1 Give precedence to safety and health of persons and protection of environment over cost and schedule considerations for Work.

.2 Should unforeseen or peculiar safety related hazard or condition become evident during performance of Work, immediately take measures to rectify situation and prevent damage or harm. Advise Departmental Representative verbally and in writing.

-
- 1.8 Filing Of Notice .1 File Notice of Project with pertinent provincial health and safety authorities prior to beginning of Work.
.1 Departmental Representative will assist in locating address if needed.
- 1.9 Permits .1 Post permits, licenses and compliance certificates, specified in section 01 10 10, at Work Site.
.2 Where a particular permit or compliance certificate cannot be obtained, notify Departmental Representative in writing and obtain approval to proceed before carrying out applicable portion of work.
- 1.10 Hazard Assessments .1 Perform site specific health and safety hazard assessment of the Work and its site.
.2 Carryout initial assessment prior to commencement of Work with further assessments as needed during progress of work, including when new trades and subcontractors arrive on site.
.3 Record results and address in Health and Safety Plan.
.4 Keep documentation on site for entire duration of the Work.
- 1.11 Project/Site Conditions .1 Following are potential health, environmental and safety hazards at the site for which Work may involve contact with:
.1 Existing hazardous and controlled products stored on site:
.1 None are known.
.2 Existing hazardous substances or contaminated materials:
.1 Creosote timber and impacted soil to be excavated.
.3 Known latent site and environmental conditions:
-

-
- .1 Work will be occurring in a marine environment and will be occurring over water.
 - .4 Facility on-going operations:
 - .1 The Site is a part of an operational ferry facility.
 - .2 Ferry operators will be on Site.
 - .2 Above items shall not be construed as being Complete and inclusive of potential health and safety hazards encountered during Work.
 - .3 Include above items in the hazard assessment of the Work.
 - .4 MSDS Data sheets of pertinent hazardous and controlled products stored on site can be obtained from Departmental Representative.
 - 1.12 Meetings
 - .1 Attend pre-construction health and safety meeting, convened and chaired by Departmental Representative, prior to commencement of Work, at time, date and location determined by Departmental Representative. Ensure attendance of:
 - .1 Superintendent of Work.
 - .2 Designated Health & Safety Site Representative.
 - .3 Subcontractors.
 - .2 Conduct regularly scheduled tool box and safety meetings during the Work in conformance with Occupational Health and Safety regulations.
 - .3 Keep documents on site.
 - 1.13 Health and Safety Plan
 - .1 Prior to commencement of Work, develop written Health and Safety Plan specific to the Work. Implement, maintain, and enforce Plan for entire duration of Work
-

and until final demobilization from site.

- .2 Health and Safety Plan shall include the following components:
 - .1 List of health risks and safety hazards identified by hazard assessment.
 - .2 Control measures used to mitigate risks and hazards identified.
 - .3 On-site Contingency and Emergency Response Plan as specified below.
 - .4 On-site Communication Plan as specified below.
 - .5 Name of Contractor's designated Health & Safety Site Representative and information showing proof of his/her competence and reporting relationship in Contractor's company.
 - .6 Names, competence and reporting relationship of other supervisory personnel used in the Work for occupational health and safety purposes.
- .3 On-site Contingency and Emergency Response Plan shall include:
 - .1 Operational procedures, evacuation measures and communication process to be implemented in the event of an emergency.
 - .2 Evacuation Plan: site and floor plan layouts showing escape routes, marshalling areas. Details on alarm notification methods, fire drills, location of firefighting equipment and other related data.
 - .3 Name, duties and responsibilities of persons designated as Emergency Warden(s) and deputies.
 - .4 Emergency Contacts: name and telephone number of officials from:
 - .1 General Contractor and subcontractors.
 - .2 Pertinent Federal and Provincial Departments and Authorities having jurisdiction.
 - .3 Local emergency resource organizations.
 - .5 Harmonize Plan with Facility's

Emergency Response and Evacuation Plan. Departmental Representative will provide pertinent data including name of PWGSC and Facility Management contacts.

- .4 On-site Communication Plan:
 - .1 Procedures for sharing of work related safety information to workers and subcontractors, including emergency and evacuation measures.
 - .2 List of critical work activities to be communicated with Facility Manager which have a risk of endangering health and safety of Facility users.
- .5 Address all activities of the Work including those of subcontractors.
- .6 Review Health and Safety Plan regularly during the Work. Update as conditions warrant to address emerging risks and hazards, such as whenever new trade or subcontractor arrive at Work Site.
- .7 Departmental Representative will respond in writing, where deficiencies or concerns are noted and may request re-submission of the Plan with correction of deficiencies or concerns.
- .8 Post copy of the Plan, and updates, prominently on Work Site.

1.14 Safety Supervision

- .1 Employ Health & Safety Site Representative responsible for daily supervision of health and safety of the Work.
- .2 Health & Safety Site Representative may be the Superintendent of the Work or other person designated by Contractor and shall be assigned the responsibility and authority to:
 - .1 Implement, monitor and enforce daily compliance with health and safety requirements of the Work

.2 Monitor and enforce Contractor's site-specific Health and Safety Plan.

.3 Conduct site safety orientation session to persons granted access to Work Site.

.4 Ensure that persons allowed site access are knowledgeable and trained in health and safety pertinent to their activities at the site or are escorted by a competent person while on the Work Site.

.5 Stop the Work as deemed necessary for reasons of health and safety.

.3 Health & Safety Site Representative must:

.1 Be qualified and competent person in occupational health and safety.

.2 Have site-related working experience specific to activities of the Work.

.3 Be on Work Site at all times during execution of the Work.

.4 All supervisory personnel assigned to the Work shall also be competent persons.

.5 Inspections:

.1 Conduct regularly scheduled safety inspections of the Work on a minimum bi-weekly basis. Record deficiencies and remedial action taken.

.2 Conduct Formal Inspections on a minimum monthly basis. Use standardized safety inspection forms. Distribute to subcontractors.

.3 Follow-up and ensure corrective measures are taken.

.6 Cooperate with Facility's Occupational Health and Safety representative should one be designated by Departmental Representative.

.7 Keep inspection reports and supervision related documentation on site.

1.15 Training

.1 Use only skilled workers on Work Site who

are effectively trained in occupational health and safety procedures and practices pertinent to their assigned task.

- .2 Maintain employee records and evidence of training received. Make data available to Departmental Representative upon request.
- .3 When unforeseen or peculiar safety-related hazard, or condition occur during performance of Work, follow procedures in place for Employee's Right to Refuse Work in accordance with Acts and Regulations of Province having jurisdiction and advise the Departmental Representative verbally and in writing.

1.16 Minimum Site Safety Rules

- .1 Notwithstanding requirement to abide by federal and provincial health and safety regulations; ensure the following minimum safety rules are obeyed by persons granted access to Work Site:
 - .1 Wear appropriate PPE pertinent to the Work or assigned task; minimum being hard hat, safety footwear, safety glasses and hearing protection.
 - .2 Immediately report unsafe condition at site, near-miss accident, injury and damage.
 - .3 Maintain site and storage areas in a tidy condition free of hazards causing injury.
 - .4 Obey warning signs and safety tags.
- .2 Brief persons of disciplinary protocols to be taken for noncompliance. Post rules on site.

1.17 Correction Of Non-Compliance

- .1 Immediately address health and safety non-compliance issues identified by authority having jurisdiction or by Departmental Representative.
- .2 Provide the Departmental Representative with written report of action taken to

- correct non-compliance of health and safety issues identified.
- .3 Departmental Representative will stop Work if non-compliance of health and safety regulations is not corrected in a timely manner.
- 1.18 Incident Reporting .1 Investigate and report the following incidents to Departmental Representative:
- .1 Incidents requiring notification to Provincial Department of Occupational Safety and Health, Workers Compensation Board or to other regulatory Agency.
 - .2 Medical aid injuries.
 - .3 Property damage in excess of \$10,000.00,
 - .4 Interruptions to Facility operations resulting in an operational lost to a Federal department in excess of \$5,000.00.
- .2 Submit report in writing.
- 1.19 Hazardous Products .1 Comply with requirements of Workplace Hazardous Materials Information System (WHMIS).
- .2 Keep MSDS data sheets for all products delivered to site.
- .1 Post on site.
 - .2 Submit copy to Departmental Representative.
 - .3 For interior work in an occupied Facility, post additional copy in one or more publically accessible locations.
- 1.20 Blasting .1 Blasting or other use of explosives is not permitted on site without prior receipt of written permission and instructions from the Departmental Representative.
- 1.21 Powder Actuated Devices .1 Use powder actuated fastening devices only after receipt of written permission from Departmental Representative.
- 1.22 Confined Spaces .1 Abide by occupational health and safety

regulations regarding work in confined spaces.

- .2 Obtain an Entry Permit in accordance with Part XI of the Canada Occupational Health and Safety Regulations for entry into an existing identified confined space located at the Facility or premises of Work.

- .1 Obtain permit from Facility Manager.

- .2 Keep copy of permit issued.

- .3 Safety for Inspectors:

- .1 Provide PPE and training to Departmental Representative and other persons who require entry into confined space to perform inspections.

- .2 Be responsible for efficacy of equipment and safety of persons during their entry and occupancy in the confined space.

1.23 Site Records

- .1 Maintain on Work Site copy of safety related documentation and reports stipulated to be produced in compliance with Acts and Regulations of authorities having jurisdiction and of those documents specified herein.

- .2 Upon request, make available to Departmental Representative or authorized Safety Officer for inspection.

1.24 Posting of Documents

- .1 Ensure applicable items, articles, notices and orders are posted in conspicuous location on Work Site in accordance with Acts and Regulations of Province having jurisdiction.

- .2 Post other documents as specified herein, including:

- .1 Site specific Health and Safety Plan.

- .2 WHMIS data sheets.

1.2 Definitions

- .1 Buffer zone: a vegetated land that protects watercourses from adjacent land uses. It refers to the land adjacent to

watercourses, such as streams, rivers, lakes, ponds, oceans, and wetlands, including the floodplain and the transitional lands between the watercourse and the drier upland areas.

- .2 Deleterious substance: (a) any substance that, if added to any water, would degrade or alter or form part of a process of degradation or alteration of the quality of that water so that it is rendered or is likely to be rendered deleterious to fish or fish habitat or to the use by man of fish that frequent that water, or (b) any water that contains a substance in such quantity or concentration, or that has been so treated, processed or changed, by heat or other means, from a natural state that it would, if added to any other water, degrade or alter or form part of a process of degradation or alteration of the quality of that water so that it is rendered or is likely to be rendered deleterious to fish or fish habitat or to the use by man of fish that frequent that water.
- .3 Fish habitat: spawning grounds and any other areas, including nursery, rearing, food supply and migration areas, on which fish depend directly or indirectly in order to carry out their life processes.
- .4 Hazardous material: Product, substance, or organism that is used for its original purpose; and that is either dangerous goods or a material that may cause adverse impact to the environment or adversely affect health of persons, animals, or plant life when released into the environment.
- .5 Invasive or alien species: refers to a species or subspecies introduced outside its normal distribution whose

establishment and spread threaten ecosystems, habitats or species with economic or environmental harm.

.6 Navigable water: a canal and any other body of water created or altered as a result of the construction of any work.

.7 Surface watercourse: refers to the bed and shore of a river, stream, lake, creek, pond, marsh, estuary or salt-water body that contains water for at least part of each year.

.8 Wetlands: land where the water table is at, near or above the surface or which is saturated for a long enough period to promote such features as wet-altered soils and water tolerant vegetation. Wetlands include organic wetlands or "peatlands," and mineral wetlands or mineral soil areas that are influenced by excess water but produce little or no peat.

1.3 Transportation

.1 Transport hazardous materials and hazardous waste in compliance with the Transportation of Dangerous Goods Act.

.2 Eliminate free board spillage when excavating, loading and hauling dredged/excavated material.

.3 Trucks transporting excavated material will have watertight boxes.

.4 Do not overload trucks when hauling dredged/excavated material.

.5 Maintain trucks clean and free of mud, dirt and other foreign matter.

.6 Secure contents against spillage. Avoid potential release of contents and of any foreign matter onto highways, roads and access routes used for the work.

Immediately clean any ground spills and soils to extent as directed by authority having jurisdiction.

- .7 Prior to commencement of work, advise and seek approval from the Departmental Representative of the existing roads and temporary routes / roads (including the construction of any temporary causeways or access roads for the purposes of the project) proposed to be used to access work areas and to haul material to and from the site, including roads to the excavated material disposal site.
- .8 Work activities must comply with all / any conditions of the Navigation Protection Act (NPA) approval issued by Transport Canada. A copy of the NPA approval will be provided to the Contractor and must be kept on-site while the work is in progress.

1.4 Temporary Causeways and Access Roads

- .1 It will be the Contractor's responsibility to gain access to the construction and dredging areas. The construction and removal of temporary causeways and access roads will be at the Contractor's expense and will be removed immediately after clearance of the project area.
 - .2 Identify a location for the disposal of material imported by the Contractor for the construction of temporary causeways and access roads.
 - .3 All material used for construction of temporary causeways and access roads must be clean and free from excessive fines, organics, debris and non-toxic (i.e., free of fuel, oil, grease and/or any other contaminants), non-ore bearing and from a provincially approved non-water source.
-

-
- .4 Material is to be screened, if required, to prevent any fines or stones less than 0.2 kilograms are placed in the work.
 - .5 Heavy machinery and equipment will not be allowed in the water and must be operated from a dry platform only. Temporary causeways and access roads shall be constructed at an elevation such that machinery and equipment is operating completely out of the water at all stages of the tide. If tidal work is being carried out, machinery and equipment shall be relocated back to a suitable elevation to prevent operating in submerged waters.
 - .6 Maintain temporary buoys to mark the position of the access road including the outer toe as construction proceeds. All buoys are to meet requirements of the applicable Canadian Coast Guard standard and be equipped with radar reflectors.
 - 1.5 Operation of Machinery
 - .1 Confirm machinery arrives on site in a clean condition and is maintained free of fluid leaks, invasive species and noxious weeds.
 - .2 Whenever possible, operate machinery on land above the high water mark, on ice, or from a floating barge in a manner that minimizes disturbance to the banks and bed of the water body.
 - .3 Wash, refuel and service machinery and store fuel and other materials for the machinery in such a way as to prevent any deleterious substances from entering the water.
 - 1.6 Disposal of Dredged Material
 - .1 All excavated/dredged material must be disposed of behind containment berms for service areas, as indicated on tender drawings.
-

-
- .2 Water that decants from the disposed dredge spoil shall not enter any waterways.
- .3 Items such as rubber tires, bottles, cans and other debris or litter must be removed from the disposal site following regrading. Failure to remove such debris may constitute a littering offence under applicable regulations.
- .4 Control runoff of water containing suspended materials or other harmful substances in accordance with requirements of all federal, provincial and municipal authorities having jurisdiction.
- 1.7 Containment and Spill Management
- .1 Comply with Federal (CEPA *Storage Tank Systems for Petroleum Products and Allied Petroleum Products Regulations*) and Provincial regulations, codes, standards and guidelines for the storage of fuel and allied petroleum products on site.
- .2 Do not dump petroleum products or any other deleterious substances on ground or in the water.
- .3 Be diligent and take all necessary precautions to avoid spills and contaminate the soil and water (both surface and subsurface) when handling petroleum products on site and during fueling and servicing of vehicles and equipment.
- .4 Maintain on site appropriate emergency spill response equipment consisting of at least one 250-litre (55 gallon) overpack spill kit for containment and cleanup of spills.
- .5 Maintain vehicles and equipment in good working order to prevent leaks on site.
-

-
- .6 In the event of a petroleum spill, immediately notify the Departmental Representative and the Canadian Coast Guard (CCG) at 1-800-565-1633 (24 hour report line). Perform clean-up in accordance with all regulations and procedures stipulated by authority having jurisdiction.
- .7 Materials such as paint, primers, blasting abrasives, rust solvents, degreasers, grout, or other chemicals are not to enter the watercourse.
- .8 Develop a response plan that is to be implemented immediately in the event of a sediment release or spill of a deleterious substance.
- 1.8 Hazardous Material Handling
- .1 Store and handle hazardous materials in accordance with applicable federal and provincial regulations, codes, standards and guidelines. Store in a location that will prevent spillage into the environment.
- .2 Label containers to WHMIS requirements and keep MSDS data sheets on site for all hazardous materials.
- .3 Maintain inventory of hazardous materials and hazardous waste stored on site. List items by product name, quantity and date when storage.
- .4 Store and handle flammable and combustible materials in accordance with National Fire Code.
- 1.9 Disposal of Wastes
- .1 Do not bury rubbish, construction and demolition debris (i.e., concrete, creosote timbers, steel, impacted soil materials etc.) and waste materials on site.
-

-
- .2 Construction material and debris are not allowed to become waterborne.
 - .3 No person shall permit any tools, equipment, vehicles, temporary structures or parts thereof used or maintained for the purpose of building or placing a work in a navigable water to remain in such water after the completion of the project.
 - .4 All work(s) and associated equipment shall be removed from the waterway at Contractor's expense in the event the operation of the work(s) is terminated.
 - .5 Dispose and recycle construction and demolition debris and waste materials in accordance with Provincial Waste Management Regulations and the project waste management requirements specified in Section 02 41 00 - Selective Site Removals.
 - .6 Do not dispose of hazardous waste, volatile materials (such as mineral spirits, paints, thinners etc.) and petroleum products into waterways, storm or sanitary sewers or in waste landfill sites.
 - .7 Dispose of hazardous waste in accordance with applicable federal and provincial, regulations, codes, standards and guidelines.
 - .8 Daily clean-up of floating or sinking construction materials, litter, and other debris arising from the work site will be conducted to ensure protection of the marine environment. Any construction debris/material that enters the marine environment should be removed immediately and be disposed of in a provincially approved manner.
-

- .9 Concrete waste:
 - .1 Do not discharge residual or rejected concrete on site.
 - .2 Immediately clean any accidental release of concrete on site prior to solidification.
 - .3 Do not wash and clean concrete vehicles on site.
 - .4 Perform dumping of residual material and truck cleaning operations only at the concrete plant. Follow environmental regulations and good practices as approved by the Provincial Department of the Environment and other authorities having jurisdiction.

1.10 Water Quality

- .1 Conduct dredging/excavation of a watercourse in such a manner to limit turbidity and reduce sediment suspension in the water to an absolute minimum at all times.
 - .1 Maintain appropriate production speed and momentum of the excavation equipment. Make adjustments as required and as approved by Departmental Representative.
 - .2 Strategically position excavator equipment and haul vehicles to avoid over the water swings of excavated material whenever possible.
 - .3 Restrict the amount of material excavated to the area and depth required for the project.
 - .4 Dredged material must not re-enter the waterway.
 - .5 Avoid bottom stockpiling, dragging, or side casting material during dredging/excavation.
 - a) If these activities are being proposed, the Contractor must:
 - i.) Employ suitable operational and engineering controls (e.g., silt curtain), as approved by the Departmental

Representative, around the in-water work or dredge areas, or

ii) Hire a qualified professional to develop a Water Quality Monitoring (WQM) program for the site. The Contractor will not be permitted to start any in-water work or dredging until the WQM program is approved by the Departmental Representative. The WQM program will require direct-read turbidity measurements from a data-logger as well as collection of water samples for Total Suspended Solids (TSS) for off-site analysis in a certified laboratory. The WQM program will include a suitable number of fixed collection points from which data shall be collected prior to any in-water work or dredging operations to establish background levels of turbidity and TSS. A collection point must also be established for the collection of data within 30 meters of the in-water work or dredge area while the equipment is operating. If the turbidity and TSS results at any of the collection points exceed the CCME Water Quality Guidelines for the Protection of Aquatic Life, the Contractor shall cease in-water work activities immediately and a DFO Fisheries Protection Program (FPP) Biologist, Jean-Francois Mallet must be contacted at 506-851-2913 to determine what adaptive measures shall be employed including additional

operational and engineering controls (e.g. silt curtains).

- .2 Visual monitoring for suspended solids shall occur daily during periods of in water works, dredging and other related work. If any changes occur in the turbidity of the water in the vicinity of the work area as a result of construction activities, the work should immediately stop and Jean-Francois Mallet will be contacted at 506-851-2913 to determine if further mitigation measures are required.
 - .3 Where work may affect the water quality adjacent to water intake lines used by lobster holding facilities, fish processing facilities and other harbour users, schedule work in cooperation with the Harbour Authority as directed by Departmental Representative to minimize interference and impact to harbour users.
 - .4 Do not wash down equipment within a 30 metre buffer zone of a wetland, watercourse or other identified environmentally sensitive area.
 - .5 Install effective sediment control measures before starting work to prevent the entry or re-suspension of sediment in the water body. Inspect sediment control measures regularly to ensure they are functioning properly, and make all necessary repairs if any damage occurs. Upon completion of use, remove these control measures in a way that prevents the escape of settled sediment.
 - .1 The interior face of the service areas must be lined with filter fabric in a manner to ensure that the dredge material remains in the service areas and does not re-enter Havre Boucher Harbour or any other waterbody.
-

.2 The dredge material in the service areas will be held in place with a granular fill layer/geotextile.

.3 The material in the service areas must be stabilized to ensure that the material remains in the service area and does not re-enter Havre Boucher Harbour or any other waterbody.

.6 All soils resulting from the construction must be stabilized as soon as possible in order to control sediment runoff during and after construction.

.7 Develop and implement an Erosion and Sediment Control Plan for the site that minimizes risk of sedimentation of the water body during all phases of the work. Erosion and sediment control measures should be maintained until all disturbed ground has been permanently stabilized, suspended sediment has resettled to the bed of the water body or settling basin and runoff water is clear. The plan should, where applicable, include:

a) Installation of effective erosion and sediment control measures before starting work to prevent sediment from entering the water body.

b) Measures for managing water flowing onto the site, as well as water being pumped / diverted from the site such that sediment is filtered out prior to the water entering a water body. For example, pumping / diversion of water to a vegetated area, construction of a settling basin or other filtration system.

c) Site isolation measures (e.g., silt boom or silt curtain) for containing suspended sediment where in-water work is required (e.g., dredging, construction, underwater cable installation).

d) Measures for containing and stabilizing waste material (e.g., dredge material/excavated material, construction

waste and materials, commercial logging waste, uprooted or cut aquatic plants, accumulated debris) above the high water mark of nearby water bodies to prevent re-entry.

e) Regular inspection and maintenance of erosion and sediment control measures and structures during the course of the work.

f) Repairs to erosion and sediment control measures and structures if damage occurs.

g) Removal of non-biodegradable erosion and sediment control materials once site is stabilized.

.8 Water contamination by preservative treated wood:

.1 Preservative treated lumber and timber, whether plant or site treated, shall be cured for a minimum of 30 days from date of the treatment application before their installation in areas which will be in contact with the water.

.2 Do not cut treated wood lumber over the surface of a watercourse or wetland.

.3 Do not use liquid applied preservative products over the surface of a watercourse or wetland.

.4 Wood treated with Chromate Copper Arsenate (CCA) or Ammoniac Copper Zinc Arsenate (ACZA) must be CSA or American Wood Preserver Association (AWPA)

.5 Do not use timber and lumber treated with creosote, petroleum and pentachlorophenol for any part of the work.

1.11 Socioeconomic
Restrictions

.1 Abide by municipal and provincial regulations for any restrictions on work performed during the night time and on flood lighting of the site. Obtain applicable permits.

-
- .2 Place flood lights in opposite direction of adjacent residential and business areas.
- .3 Work equipment and machinery must be equipped with purposely designed mufflers to reduce noise on site to lowest possible level. Maintain mufflers in good operating condition at all times.
- 1.12 Bird and Bird
Habitat
- .1 Become knowledgeable with and abide by the Migratory Birds Convention Act (MBCA) in regards to the protection of migratory birds, their eggs, nests and their young encountered on site and in the vicinity.
- .2 Minimize disturbance to all birds on site and adjacent areas during the entire course of the Work.
- .3 Do not approach concentrations of seabirds, waterfowl and shorebirds when anchoring equipment, accessing wharves or ferrying supplies.
- .4 During night time work, position flood lights in opposite direction of nearby bird nesting habitat.
- .5 Do not use beaches, dunes and other natural previously undisturbed areas of the site to conduct work unless specifically approved by the Departmental Representative.
- .6 Should nests of migratory birds in wetlands be encountered during work, immediately notify Departmental Representative for directives to be followed.
- .1 Do not disturb nest site and neighbouring vegetation until nesting is completed.
- .2 Minimize work immediately adjacent to such areas until nesting is completed.
-

.3 Protect these areas by following recommendations of Canadian Wildlife Service.

1.13 Fish Protection

- .1 Avoid wet, windy and rainy periods that may increase erosion and sedimentation.
- .2 Confirm all in-water activities, or associated in-water structures, do not interfere with fish passage, constrict the channel width, or reduce flows.
- .3 Screen any water intakes or outlet pipes to prevent entrainment or impingement of fish. Entrainment occurs when a fish is drawn into a water intake and cannot escape. Impingement occurs when an entrapped fish is held in contact with the intake screen and is unable to free itself.
- .4 Be aware of the risk for contamination of the fish habitat at the site as a result of alien species being introduced in the water.
- .5 To minimize the possibility of fish habitat contamination and the spread of aquatic invasive (alien species), all construction equipment which will be immersed into the water of a watercourse, or has the possibility of coming into contact with such water during the course of the work, must be cleaned and washed to ensure that they are free of marine growth and alien species.
 - .1 Equipment to include boats, barges, cranes, excavators, haul trucks, pumps, pipe lines and other all miscellaneous tools and equipment previously used in a marine environment.
- .6 Perform cleaning and washing of equipment immediately upon their arrival at the site and before use in or over the body of water.

-
- .7 Conduct cleaning and washing operations as follows:
 - .1 Scrape and remove heavy accumulation of mud and dispose appropriately.
 - .2 Wash all surfaces of equipment by use of a pressurized fresh water supply.
 - .3 Immediately follow with application of a heavy sprayed coating of undiluted vinegar or other environmentally approved cleaning agent to thoroughly remove all plant matter, animals and sediments.
 - .4 Check and remove all plant, animal and sediment matter from the all bilges and filters.
 - .5 Drain standing water from equipment and let fully dry before use.
 - .6 Upon removal from the water, drain standing water from equipment and let fully dry before removal off the site.
 - .8 Do not perform cleaning and washdown within a 30 metre buffer zone of a wetland, watercourse or other identified environmentally sensitive area.
 - .9 Record of Assurance Logbook:
 - .1 Maintain an on-going log of past and present usage and washdowns of all equipment to illustrate mitigation measures undertaken against fish habitat contamination by alien species.
 - .2 Write data in a hard cover bound logbook to include the following:
 - .1 Date and location where equipment was previously used in a watercourse or wetland;
 - .2 Type of work performed.
 - .3 Dates of wash down for each piece of equipment;
 - .4 Cleaning method and cleaning agent(s) used.
 - .10 Keep Record of Assurance Logbook updated from project to project. Upon request,
-

submit logbook to Departmental Representative for review.

- .11 Abide by requirements and recommendations from Fisheries and Oceans Canada - Fisheries Protection Program in cleaning and wash down of equipment.
- .12 Work activities must comply with all conditions of the Fisheries Act Authorization (FAA). Departmental Representative shall provide a copy of the FAA, which must remain onsite at all times, while work is in progress.
- .13 Implement project works and mitigation measures to the satisfaction of the Departmental Representative.
- .14 The deposition of a deleterious substance in water frequented by fish is not permitted. The Fisheries Act prohibits the deposit of any deleterious substance into waters frequented by fish.

1.14 Air Quality

- .1 Keep airborne dust and dirt resulting from the work on site to an absolute minimum.
- .2 Dust suppression by the application of water must be employed, when required. Apply dust control measures to roads, parking lots and work areas. The Departmental Representative will determine locations where water is to be applied, the amount of water to be applied, and the times at which it will be applied. Waste oil must not to be used for dust control under any circumstances.
- .3 Spray surfaces with water or other environmentally approved product. Use purposely suited equipment or machinery and apply in sufficient quantity and frequency to provide effective result and

continued dust control during the entire course of the work.

- .4 Do not use oil or any other petroleum products for dust control.

1.15 Fires

- .1 Fires and burning of rubbish on site is not permitted.

1.16 Archaeological

- .1 All construction personnel are responsible for reporting any unusual materials unearthed during construction to the construction supervisor. If the find is believed to be an archaeological resource, the construction supervisor will immediately stop work in the vicinity of the find and notify his / her immediate supervisor.
- .2 If an archaeological and / or historically significant item is discovered during work activities, work in the area will be stopped immediately and the Departmental representative will be contacted as well as the provincial Archaeological Services unit.

-
- | | | |
|---|----|--|
| 1. <u>Related Requirements</u> | .1 | Particular requirements for inspection and testing to be carried out by testing laboratory designated by Departmental Representative are specified under various sections. |
| 2. <u>Appointment and Payment</u> | .1 | Departmental Representative will appoint and pay for services of testing laboratory except for the following:
.1 Inspection and testing required by laws, ordinances, rules, regulations or orders of public authorities.
.2 Inspection and testing performed exclusively for Contractor's convenience.
.3 Testing, adjustment and balancing of conveying systems, mechanical and electrical equipment and systems.
.4 Mill tests and certificates of compliance.
.5 Tests specified to be carried out by Contractor under the supervision of Departmental Representative. |
| | .2 | Where tests or inspections by designated testing laboratory reveal work not in accordance with contract requirements, Contractor shall pay costs for additional tests or inspections as Departmental Representative may require to verify acceptability of corrected work. |
| 3. <u>Contractor's Responsibilities</u> | .1 | Furnish labour and facilities to:
.1 Provide access to work to be inspected and tested.
.2 Facilitate inspections and tests.
.3 Make good work disturbed by inspection and test.
.4 Provide storage on site for laboratory's exclusive use to store equipment and cure test samples. |
| | .2 | Notify Departmental Representative sufficiently in advance of operations to |
-

allow for assignment of laboratory
personal and scheduling of test.

.3 Where materials are specified to be
tested, deliver representative samples
in required quantity to testing
laboratory.

.4 Pay costs for uncovering and making good
work that is covered before required
inspection or testing is completed and
approved by Departmental Representative

-
- | | | |
|---|----|---|
| 1. <u>Access</u> | .1 | Provide and maintain adequate access to project site. |
| | .2 | If authorized to use existing roads or structures for access to project site, maintain such roads for duration of Contract and make good damage resulting from Contractor's use of roads. |
| | .3 | The contractor is to maintain full access to the work site. Should a court injunction be required ordering a person or group to refrain from impeding access to the site, such as a demonstration, picketing or union action, then obtaining the injunction and any associated costs will be considered incidental to this contract. Any delays associated with such activity will be considered incidental to this contract. |
| 2. <u>Contractor's Site Office</u> | .1 | Establish on the site of the work and keep open at all times during the execution of the work an office where all letters, orders, notices and other communications may be received or acknowledged either by the Contractor or his authorized agent or representative. Provide a telephone in the office. |
| | .2 | Keep one up-to-date copy of contract documents, bulletins and other materials as specified under Section 01 10 10. |
| 3. <u>Departmental Representative's Site Office</u> | .1 | Provide temporary office for sole use of Departmental Representative, complete with heat and lights. Insulated office required during October to May. Locate on or adjacent to site. |
| | .2 | Inside dimensions minimum 5 m long x 3 m wide x 2.4 m high, with floor 0.3 m above grade, complete with 4-50% opening windows and one lockable door. |
-

-
- | | | |
|----|----------------------------|--|
| | .3 | Arrange and pay for telephone installation and service in Departmental Representative's office for the Departmental Representative's exclusive use. Long distance calls placed on this phone by the Departmental Representative will be paid for by Departmental Representative. |
| | .4 | Washroom facilities not required in the office. Provide outside sanitary facilities to approval. |
| | .5 | Equip office with six chairs, flat 1200 X 2400 X 25 table with writing surface and 4 drawer lockable filing cabinet. |
| | .6 | Maintain in clean condition. |
| 4. | <u>Storage Sheds</u> | |
| | .1 | Provide adequate weather tight sheds with raised floors, for storage of materials, tools and equipment which are subject to damage by weather. |
| | .2 | Make arrangements for on-site storage areas with the Departmental Representative. |
| 5. | <u>Sanitary Facilities</u> | |
| | .1 | Provide sanitary facilities for work force in accordance with governing regulations and ordinances. |
| | .2 | Post notices and take such precautions as required by local health authorities. Keep area and premises in sanitary condition. |
| 6. | <u>Parking</u> | |
| | .1 | Make arrangements to provide parking space for work force with the Departmental Representative. |
| 7. | <u>Power</u> | |
| | .1 | Arrange, pay for and maintain temporary electrical power supply in accordance with governing regulations and ordinances. |
-

-
- | | | |
|-----------------------------------|----|--|
| | .2 | Install temporary facilities for power such as pole lines and cables to approval of local power supply authority. |
| 8. <u>Water Supply</u> | .1 | Arrange, pay for and maintain temporary water supply in accordance with governing regulations and ordinances. |
| 9. <u>Barricades</u> | .1 | Provide and maintain sufficient barricades, fencing, notices, warning signs, light signals, etc. for the protection of adjoining property and to warn others and workmen engaged on the job of the dangers caused by the work. |
| | .2 | Types and location of barricades, etc. to be in accordance with local regulations and to the satisfaction of Departmental Representative. |
| | .3 | The presence of such barricades, lights, etc. shall not relieve the Contractor of the responsibility for any damages. |
| 10. <u>Security</u> | .1 | Provide security of his equipment, materials, damages resulting from fire and theft. |
| 11. <u>Site Signs and Notices</u> | .1 | Only Project Identification and Consultant/ Contractor signboards and notices for safety or instruction are permitted on site. |
| | .2 | Format, location and quantity of site signs and notices to be accepted by Departmental Representative. |
| | .3 | Signs and notices for safety or instruction to be in English and French languages, or commonly understood graphic symbols. |
-

- | | |
|--|--|
| 12. Removal of
Temporary
<u>Facilities</u> | .1 Remove temporary facilities from site
when directed by Departmental
Representative. |
| | .2 When project is closed down for a period
of time, keep temporary facilities
operational until no longer required by
Departmental Representative. |

-
- | | | |
|--------------------------------------|----|--|
| 1. <u>General</u> | .1 | Use new material and equipment unless otherwise specified. |
| | .2 | Submit following information for any or all materials and products proposed for supply within seven (7) days of request by Departmental Representative:
.1 name and address of manufacturer
.2 trade name, model and catalogue number
.3 performance, descriptive and test data
.4 manufacturer's installation or application instructions
.5 evidence of arrangements to procure. |
| | .3 | Provide material and equipment of specified design and quality, performing to published ratings and for which replacement parts are readily available. |
| | .4 | Use products of one (1) manufacturer for equipment or material of same type or classification unless otherwise specified. |
| 2. <u>Manufacturers Instructions</u> | .1 | Unless otherwise specified, comply with manufacturer's latest printed instructions for materials and installation methods. |
| | .2 | Notify Departmental Representative in writing of any conflict between these specifications and manufacturer's instructions. Departmental Representative will designate which document is to be followed. |
| 3. <u>Fastenings-General</u> | .1 | All fastenings are to be the sizes indicated on the contract plans and are to be hot dipped galvanized to ASTM A123 unless otherwise noted. |
-

-
- | | | | |
|----|-----------------------------|----|---|
| 4. | <u>Delivery and Storage</u> | .1 | Deliver, store and maintain packaged material and equipment with manufacturer's seal and labels intact. |
| | | .2 | Prevent damage, adulteration and soiling of material and equipment during delivery, handling and storage. Immediately remove rejected material and equipment from site. |
| | | .3 | Store material and equipment in accordance with supplier's instructions. |
| 5. | <u>Conformance</u> | .1 | When material or equipment is specified by standard or performance specifications, upon request of Departmental Representative, obtain from manufacturer an independent testing laboratory report, stating that material or equipment meets or exceeds specified requirements. |
| 6. | <u>Substitution</u> | .1 | Proposals for substitution may be submitted only after award of Contract. Such requests must include statements of respective costs of items originally specified and proposed substitutions. |
| | | .2 | Proposals will be considered by Departmental Representative if:
.1 Products selected by tenderer from those specified, are not available, or
.2 Delivery date of products from those specified would unduly delay completion of Contract, or
.3 Alternative products to those specified, which are brought to attention of, and considered by Departmental Representative as equivalent to those specified and will result in a credit to Contract amount. |
-

- .3 Should proposed substitution be accepted either in part or in whole, assume full responsibility and costs when substitution affects other work on project. Pay for design or drawing changes required as result of substitution.
- .4 Amounts of all credits arising from approval of substitutions will be determined by Departmental Representative and Contract price will be reduced accordingly. No substitutions will be permitted without prior written approval of Departmental Representative.
- .5 Owner reserves the right for acceptance or rejection of substitution of materials.
7. Construction Equipment and Plant
- .1 On request, prove to the satisfaction of Departmental Representative that the construction equipment and plant are adequate to manufacture, transport, place and finish work to quality and production rates specified. If inadequate, replace or provide additional equipment or plant as directed.
- .2 Maintain construction equipment and plant in good operating order.
8. Damaged and Rejected Materials
- .1 Immediately replace, repair or otherwise make good any material damaged, broken or defaced during construction to the satisfaction of Departmental Representative.
- .2 Remove rejected materials from site.

- 1.1 Record
Drawings
- .1 Departmental Representative will provide two sets of white prints for record drawing purposes.
 - .2 Maintain project record drawings and accurately record deviations from contract documents caused by site conditions and changes ordered by Departmental Representative.
 - .3 Mark changes in red coloured ink.
 - .4 Record following information:
 - .1 Elevations of various elements in relation to Chart Datum.
 - .2 Field changes in dimensions and details.
 - .3 Changes made by Change Order.
 - .5 At completion of project and prior to final inspection, neatly transfer notations to second set and submit both sets to Departmental Representative.

- | | | |
|---|-------------------------------------|---|
| 1 | <u>General</u> | <ul style="list-style-type: none">.1 Conduct cleaning and disposal operations to comply with local ordinances and antipollution laws..2 Store volatile waste in covered metal containers and remove from premises at end of each working day..3 Prevent accumulation of waste which creates hazardous conditions. |
| 2 | <u>Cleaning During Construction</u> | <ul style="list-style-type: none">.1 Maintain the work, at least on a daily basis free from accumulations of waste material and debris..2 Provide on-site containers for collection of waste materials, and debris..3 Remove waste materials, and debris from site..4 Schedule cleaning operations so that resulting dust, debris and other contaminants will not fall on wet, newly painted surfaces. |
| 3 | <u>Final Cleaning</u> | <ul style="list-style-type: none">.1 In preparation for acceptance of the project on an interim or final certificate of completion perform final cleaning..2 Remove grease, dust, dirt, stains, and other foreign materials, from exterior finished surfaces. |
