Amendment 003 has been raised to extend the closing date, answer questions and revise the RFP as follows:

Closing Date:

The solicitation closing date has changed from January 6, 2016 @ 2PM EDT to January 29, 2016 @ 2PM EST.

PART A:

| NUMBER | QUESTION | ANSWER |
|--------|--|---|
| 1 | <p>Question 17 Article 2. AED User Interface</p> <p>Do you need a fully automatic or semi-automatic AED?</p> <p>Fully automatic: attach electrodes to the patient, switch the unit on and let the device analyse. The device will automatically deliver the shock if necessary.</p> <p>Semi-automatic: attach electrodes to the patient, switch the unit and let the device analyse. Press the shock button if recommended by the device.</p> | <p>The HSFC guidelines on common AED features include the ability of AED units to:</p> <ul style="list-style-type: none">• automatically analyze heart rhythms and determine whether defibrillation is appropriate;• guide users step-by-step through the process and advise if a shock is required;• advise users when to perform CPR; and• store incident data for review. <p>The training offered to first aid attendants at Health Canada and the Public Health Agency of Canada is in compliance with Legislation (<i>The Canada Labour Code Part II, Part XVI</i>) for standard first aid certification. The training also meets the HSFC Guidelines. In accordance with the Legislation, attendants are being trained in the use of <u>semi-automatic</u> AED equipment. Health Canada will need semi-automatic AEDs.</p> |
| 2 | <p>Question 18 Article 2. AED User Interface</p> <p>Do you want to display the ECG on the LCD screen of the AED? If yes, it is recommended to have an ECG view time of at least 3 seconds.</p> | <p>The AED User Interface requirements are as stated at Annex A, 2(b)</p> <p><u>Bidders, please note this requirement remains unchanged.</u></p> |
| 3 | <p>Question 19 Article 4. AED Specific Technical Requirements</p> <p><i>"e. The AED must have a visual indicator and emit an auditory tone if the unit requires service"</i></p> <p>Does this include a visual indicator and auditory tone when</p> | <p>The AED Specific Technical Requirements are as stated at Annex A, 4 (e)</p> <p><u>Bidders, please note this requirement remains unchanged</u></p> <p>A visual indicator and auditory tone when the battery is low is essential, as the service of the equipment relies on the battery's efficacy.</p> |

| | | |
|---|--|---|
| | the battery is low? | |
| 4 | For some technical points, we can't relate to our technical documentation to prove what you ask for, so we need to confirm those points per our proposal? IE: we don't have technical sheets for our walled casings, nor for our AED signs, so if we commit to your demands in our offer, is that enough? | No. Bidders must provide all supporting documentation to demonstrate and substantiate how their proposal will meet the requirements of the bid solicitation -- e.g. operational manual, written declarations, photographs etc. |
| 5 | About our walled casings; there is no alarm when the batteries (for the alarm, not the AED) go empty (Annex A, point 6.c.), is that a deal breaker? | <u>Yes. This is a mandatory requirement. Bidders, please note the requirement remains unchanged.</u> |
| 6 | About the triangular AED signs (Annex A, point 7.a. & 7.b.), we have unilingual signs that have the 1 inch tabs on each side OR bilingual signs that don't quite have 1 inch on each side, would any of the 2 be ok? | The mandatory requirement 7(a) remains unchanged. Mandatory requirement 7(b) has been modified. Please see Part 1 above. |
| 7 | At page 10 of 26, point 3.1.3. e) where will the AEDs be installed? Do you have the addresses of the buildings where those inspections will take place? Those visits, if the AEDs are in many buildings, will have a great influence on the final prices. | This item is deleted. |
| 8 | Please confirm whether or not you need 10 non-rechargeable lithium batteries per AED. | Mandatory requirement 1(a)(iii) has been modified. |
| 9 | ANNEX A, Article 2 – AED User Interface <i>"The AED must have an LCD screen which displays text messages corresponding to : [...] ii. CPR depth feedback prompt,"</i> Displaying the depth of the compression is not standard. This requirement seems specific to only one brand using non-standard electrodes. Our device can display the rate of | <u>The requirement remains unchanged.</u> CPR depth feedback is required to ensure quality of compression and rate feedback is required to ensure that compressions are given in sufficient quantity and at an appropriate rate. This is in line with the HSFC guidelines that the unit "...guide users step-by-step through the process and advise if a shock is required." <u>This functionality is required, to allow for a diverse user population within Health Canada's workforce the option to operate the equipment</u> |

| | | |
|----|--|--|
| | compressions during CPR, and after the rescue, when data is uploaded from the AED, the chest compression frequency, Intervention Duration, Hands-Off Time, Chest compression Time, Hands-Off ratio, Chest compression ratio. | with ease. This includes persons with visual and hearing impairments. |
| 10 | <p>ANNEX A, Article 2 – AED User Interface</p> <p><i>"The AED must provide audiovisual CPR advisory messages for depth and rate of compressions."</i></p> <p>Same as above in Question 3: the depth of compression is not a standard measurement to be displayed, only the rate is. Can you reconsider your position?</p> | <p><u>The requirement remains unchanged.</u></p> <p>CPR depth feedback is required to ensure quality of compression and rate feedback is required to ensure that compressions are given in sufficient quantity and at an appropriate rate. This is in line with the HSFC guidelines that the unit "...guide users step-by-step through the process and advise if a shock is required." <u>This functionality is required</u> to allow for a diverse user population within our workforce the option to operate the equipment with ease. This includes persons with visual and hearing impairments.</p> |
| 11 | <p>ANNEX A, Article 3 – Environment Specifications</p> <p><i>"a. The AED must be capable of a storage temperature range between -30°C and 60°C with or without pads and batteries."</i></p> <p>The storage temperature range for our device is -20°C and +50°C. Can you confirm whether you need a storage temperature range of -30°C and 60°C or will you accept a range of -20°C and +50°C?</p> | <p><u>No, the requirement remains unchanged.</u></p> <p>The AED units will be stored in a wide-range of storage areas and facilities across the country, with varying temperature ranges.</p> |
| 12 | <p>ANNEX A, Article 3 – Environment Specifications</p> <p><i>"The minimum altitude working range must be between 0 to 4,500 m or greater above sea level."</i></p> <p>Our device has an altitude working range between 0 to 3010 m. Excluding ski resorts, the highest town in Canada is Lake Louise In Alberta (1661 m). Can you confirm whether you need an</p> | <p><u>No, the requirement remains unchanged</u></p> <p>Health Canada and the Public Health Agency of Canada have employees located in remote and isolated areas where medical air lift services are a necessity.</p> |

| | | |
|----|---|---|
| | AED working at 4,500 m? | |
| 13 | <p>ANNEX A, Article 3 – Environment Specifications <i>"f. The AED must comply with IP55 standard of Particle or equivalent (IP-55: Standard Particle, First 5L Protection against dust; some ingress allowed. Section 5: Protection against low pressure water jets in all directions, limited ingress permitted)"</i></p> <p>Our product is IP54. IP54 offers a protection against splashing water from all directions. Will you accept AEDs complying with IP54 standard?</p> | <u>No, the requirement remains unchanged.</u> |
| 14 | <p>ANNEX A, Article 4 – AED Specific Technical Requirements <i>"b. The defibrillator must have a charge time of less than 10 seconds in a fully charged battery state."</i></p> <p>For AED, the full cycle time (ECG analysis time + charge time before defibrillation) would be more relevant than charge time alone. The full cycle time better represents the time the patient is waiting to receive a defibrillation. To effectively compare AED you must consider both ECG Analysis and charge time between defibrillation. Our full cycle time is 17 seconds.</p> <p>Will you replace the charge time criteria by a full cycle time criteria?</p> | <p><u>No, the requirement remains unchanged</u> The AED must be able to administer a shock within 10 seconds of the end of a CPR cycle.</p> |
| 15 | <p>ANNEX A, Article 6 – AED Cabinets <i>"k. The cabinet must be finished in white or red epoxy paint."</i></p> <p>Do you accept white and green cabinets (same color as the</p> | <p>Mandatory requirement 6(k) has been modified. "Please see Part 1 above Yes. We will accept white and green cabinets; though white must be the dominant colour.</p> |

| | | |
|----|--|---|
| | standardized ISO 7010 defibrillator sign)? | |
| 16 | ANNEX A, Article 7 – Wall-mounted AED Signs "Will you accept ISO 7010 standardized signs?" | Yes. ISO 7010 standardized signs will be accepted. However, if the signs include text, they must be bilingual. |
| 17 | You are requesting 10 additional non-rechargeable lithium batteries and 10 additional pads. The pads have a shelf life of 5 years and the Batteries have a shelf life of 10 years. If you buy everything at the same time they will all expire at the same time. Did you want an option to buy at any time during the contract? If so would you enter a separate line so that pricing can be separate for the AED, Cabinet and Sign? | Please see modifications to Annex B. |
| 18 | Does the customer have any requirements for a bilingual defibrillator – English/French? | Yes. |
| 19 | The tender is written so that only one (1) AED manufacture would meet the specification that: a) the AED is to have a 1.a "A visual display capable of showing: Text prompts, Real Time CPR Compression Feedback with Visual Prompts, Shock Counter and Elapsed time indicator"; b) As well as meeting 2.c "The AED must provide audiovisual CPR advisory messages for depth and rate of compression." Only one unit on the market that would meet these specifications. We would like to know why other unit will not be considered. | <u>The requirement remains unchanged.</u> CPR depth feedback is required to ensure quality of compression and rate feedback is required to ensure that compressions are given in sufficient quantity and at an appropriate rate. This is in line with the HSFC guidelines that the unit "...guide users step-by-step through the process and advise if a shock is required." <u>This functionality is required in order to allow for a diverse user population within our workforce the option to operate the equipment with ease. This includes persons with visual and hearing impairments.</u> |
| 20 | Item 2.C.: Please verify what is required for "CPR advisory messages for depth and rate of compression". REAL-TIME CPR | <u>The requirement remains unchanged.</u> There is no requirement for "real-time" |

| | | |
|----|--|--|
| | <p>feedback is where the analysis technology is able to provide feedback on the quality/depth and rate of compressions during CPR. This is fundamentally different than a unit which uses accelerometer technology that only measures the depth of compressions. Accelerometer technology will give positive feedback if sufficient force is being applied to a transducer placed on the chest, this does not take in consideration for differences in patient size and shape or CPR on soft or moving surfaces (beds, boats, etc.). Please verify what is required for this tender.</p> | <p>feedback.</p> |
| 21 | <p>Regarding the addendum response A1 and A2 that visual display capable of showing: Text prompts, Real Time CPR Compression Feedback with Visual Prompts, Shock Counter and Elapsed time indicator" are needed due to internal policies, we are asking why this information is being considered when the information is not actually required to be given to EMS. Internal policies not based on actual requirements from EMS seem unfair. This should be removed.</p> | <p><u>The requirement remains unchanged.</u> Mandatory requirements 2 (b)(i) and (ii) are required to align with the HSFC Guidelines that the AED should "guide users step-by-step through the process; and (iii) that it should "store incident data for review".</p> <p><u>The functionalities are required</u> in order to allow for a diverse user population within our workforce the option to operate the equipment with ease. This includes persons with visual and hearing impairments.</p> |
| 22 | <p>Regarding the addendum response that visual display capable of showing: Text prompts, Real Time CPR Compression Feedback with Visual Prompts, Shock Counter and Elapsed time indicator" are needed due to internal policies, we are asking why this information is being considered when the information is not actually required to be given to EMS. |----|---|--|
| | seem unfair. This should be removed. | |
| 23 | <p>The storage of the battery temperature is being based on the recommendations of a specific AED manufacture, which is outside the range of the battery manufactures. AS such, no AED will be able to meet specification 3.b "The AED unit must be functional and ready to use after storage." All AEDs will need to be brought back up to operating temperatures as stated in 3.c "The AED must be capable of an operating temperature range between 0oC and 50oC.". The term "ready to use" implies, that the AED can be used at a temperature below the operating temperature and thus, storage temperatures should either be dropped or at minimum, be based on the operating temperatures so that 3.b can be met. Once again, we are asking that the "storage temperature" be removed or changed to the same the "operating temperature" so that units would be ready to use.</p> | <p><u>No, the requirement remains unchanged.</u></p> <p>For mandatory requirement 3 (b), the term "ready to use" means that the AED must be capable of functioning within the prescribed operating temperature range (0°C and 50°C) subsequent to storage.</p> |

.....

PART B:

1. Delete:

Pages 3 and 4 of 25

Replace with:

Eighty-two AED units, with bilingual (English and French) voice prompts, eighty-two wall-mounted AED cabinets, eighty-two wall-mounted AED signs in accordance with the requirement listed in Annex A. Shipping, training, manuals, software updates and preventative maintenance inspections included.

2. Delete: Page 6 of 25, Part 1 - GENERAL INFORMATION - 1.1.1 -- Optional Requirements

Replace with:

The Contractor grants to Canada the irrevocable option to purchase up to eight bilingual (English and French) AEDs under the same terms and conditions and at the prices stated in the contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment. The Contracting Authority may exercise the option prior to March 31, 2018 by sending a written notice to the Contractor.

3. Add: Page 6 of 25, Part 1 - GENERAL INFORMATION - 1.1.1 -- Optional Requirements

The Contractor grants to Canada the irrevocable option to purchase Non-Re-chargeable AED Batteries under the same terms and conditions and at the prices stated in the

contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.
The Contracting Authority may exercise the option prior to March 31, 2021 by sending a written notice to the Contractor.

4. Add: Page 6 of 25, Part 1 - GENERAL INFORMATION - 1.1.1 -- Optional Requirements

The Contractor grants to Canada the irrevocable option to purchase AED Pads under the same terms and conditions and at the prices stated in the contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.

The Contracting Authority may exercise the option prior to March 31, 2021 by sending a written notice to the Contractor.

5. Delete: Page 8 of 25, Article 3.1.1 Manuals

Replace with:

One complete set of user manuals in both hard and soft copy must be provided for each AED. All user documentation must be bilingual (English and French).

6. Delete in its entirety:

Page 8 of 25, Article 3.1.3, Service

7. Delete: Page 10 of 25, Article 3.1.6, Delivery

Replace with:

While delivery must be no later than May 11, 2016, the best delivery that could be offered by the Bidder is _____.

8. Delete: Page 13 of 25, Part 6 – Resulting Contract Clauses, Article 6.2.1, Optional Requirement

Replace with:

The Contractor grants to Canada the irrevocable option to purchase eight bilingual (English and French) AEDs under the same terms and conditions and at the prices stated in the contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.

The Contracting Authority may exercise the option prior to March 31, 2018 by sending a written notice to the Contractor.

9. Add: Page 13 of 25, Part 6 – Resulting Contract Clauses, Article 6.2.1, Optional Requirement

The Contractor grants to Canada the irrevocable option to purchase Non-Re-chargeable AED Batteries under the same terms and conditions and at the prices stated in the contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.

The Contracting Authority may exercise the option prior to March 31, 2021 by sending a written notice to the Contractor.

10. Add: Page 13 of 25, Part 6 – Resulting Contract Clauses, Article 6.2.1, Optional Requirement

The Contractor grants to Canada the irrevocable option to purchase AED Pads under the same terms and conditions and at the prices stated in the contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.

The Contracting Authority may exercise the option prior to March 31, 2021 by sending a written notice to the Contractor.

11. Delete: page 14 of 25, Article 6.2.2, Manuals

Replace with:

One complete set of user manuals in both hard and soft copy must be provided for each AED. All user documentation must be bilingual (English and French).

12. Delete in its entirety: Page 14 of 25, Article 6.2.4, Service

13. Delete: Page 14 of 25, Article 6.4.1 Delivery Date.

Replace with:

All the deliverables must be received on or before May 11, 2016.

14. Delete: Page 16 of 25, Article 6.6.1 Basis of Payment

Replace with:

In consideration of the Contractor satisfactorily completing all of its obligations under the Contract, the Contractor will be paid a firm lot price as specified in Line Item 3, DDP Delivered Duty Paid (Ottawa, Ontario) Incoterms 2000. Customs duties are included and Applicable Taxes are extra.

15. Delete: Page 16 of 25, Article 6.6.2 Optional Requirement

Replace with:

Basis of Payment – Automated External Defibrillators (eight bilingual (English and French) AEDs)
In consideration of the Contractor satisfactorily completing all of its obligations under the Contract, the Contractor will be paid a firm all inclusive unit price as specified in Annex A, DDP Delivered Duty Paid (Ottawa, Ontario) Incoterms 2000. Customs duties are included and Applicable Taxes are extra.

16. Add: Page 16 of 25, Article 6.6.2 Optional Requirement

Basis of Payment – Non-Re-chargeable AED Batteries

In consideration of the Contractor satisfactorily completing all of its obligations under the Contract, the Contractor will be paid a firm all inclusive unit price as specified in Annex A, DDP Delivered Duty Paid (Ottawa, Ontario) Incoterms 2000. Customs duties are included and Applicable Taxes are extra.
