Amendment 001 – Inflatable Projection Screen, is being issued in response to Bidder's questions and Canada's responses and to amend Annex "A" Requirement.

Q1: Reference Annex A Requirement 3.0 (v)

V. The screen should not be placed in mud (it does not clean itself) - it is highly recommend that a tarp be placed under the screen.

A1: Noted, acceptable risk.

Q2: Reference Annex A Requirement 3.0 (VII)

VII. The screen be operable "in all conditions" - the screen has a wind rating of 38kg/24mph. All plastic substrates are subject to stiffening in colder temperatures, the temperature limit is -5 Celsius.

A2: Any temperature range below zero is acceptable and any wind rating greater than 30 KM/H is acceptable.

Refer: 3.0 (VII) Annex "A" Requirement

Delete: Must be Weather resistant: ability to be used outdoors in all conditions (sun, rain, snow, and wind) without damaging equipment or voiding warranty.

Insert: Must be Weather resistant: ability to be used outdoors in all conditions including sun, rain, snow, cold (less than 0 degrees C), and wind (wind rating greater than 30 KM/H) without damaging equipment or voiding warranty.

Q3: Reference Annex A Requirement 3.0 (I)

Also, when operated in rear projection, the AIRSCREEN frame blocks part of the image size as the fabric is tightly stretched at the front of the frame. This reduces HD image size from 11.25'x20' to 9.5'x17'. If the overall image size for rear projection is a hard requirement, a larger frame should be quoted.

A3: Measurements of screen relate to size based on front facing projection.

Refer: 3.0 (I) Annex "A" Requirement

Delete: Minimum Display Screen Size: 20ft (6.1m) width x 10ft (3.05m) height

Insert: Minimum Front Display Screen Size: 20ft (6.1m) width x 10ft (3.05m) height

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
