Amendment 003 is raised for the following:

Questions from Potential Suppliers and answers from Canada

Question #1

Reference: Annex A, Requirement, A2.8 Minimum Mandatory Technical Specifications: we understand that an open book would have dimensions: (18" x 24") = 45.7 cm x 60 cm. Does-it mean that page size of a book would be: 45.7cm high by 30 cm wide?

Answer #1

Yes, 45.7 cm high by 30 cm is correct.

Question #2

Reference: Annex A, Requirement, A2.6 Minimum Mandatory Technical Specifications, the scanner must be able to automatically compensate for page curvature." Does it refer to the curvature due to misalignment of the book on the cradle?

Answer #2

When a book is open, the gutter creates curvature and this should be eliminated. That is different from someone not aligning the book properly.

Question #3

Would it be acceptable is the machine uses a V-shape glass as it flattens pages to avoid page curvature and insures perfect focus on the whole page surface?

Answer #3

If the technology performs well and does not damage the library material, provides clear scans, then it is acceptable. The scanner must be safe for archival material and produce clear scans.

All Other Instructions, Terms and Conditions remain the same
