Amendment No. 001 is raised to provide an answer to the following question:

Question 1:

In your tender W8486-163094/A; you are asking for this specification: Playback memory depth/Real-time BBG 1Gsa/Yes. We would like to know if 32Msa Playback memory depth/Real-time BBG will be acceptable. This is not clear to us if your customer want the unit to support this option or they want the 1Gsa install on the unit.

Answer 1:

This was an error in our minimum specs. 32Msa Playback memory depth/Real-time BBG is the minimum that is needed now. We have no desire to go above this at the moment; however the unit that is quoted must be upgradable to at least 1Gsa if the requirement should arise at a later time. For pricing in this solicitation, quotes need to address the 32Msa requirement only and the bidder needs to confirm that their unit can be upgraded to at least 1Gsa in the future.

All other terms and conditions of the original RFP remain unchanged.
