SOLICITATION AMENDMENT 002 IS RAISED TO REVISE ANNEX “A” STATEMENT OF REQUIREMENT AND TO RESPOND TO BIDDER QUESTIONS, AS FOLLOWS:

IN ANNEX “A” STATEMENT OF REQUIREMENT,

INSERT: 1.14. Must be a cylindrical furnace with cover opening on the top to allow for parts to hang in the furnace.

QUESTIONS AND ANSWERS:

Q2. Can you let me know the power of this furnace, the kilowatts at 575 volt, and single or 3 phase?

A2: *Electrical requirements are given in item 2.0.*

Q3. Also, can you let me know the size of the blower, and is a retort required, and is it air atmosphere? If an inert atmosphere such as nitrogen is needed to prevent oxidation of parts, then an internal gas tight retort would be needed. If it is normal air atmosphere inside furnace, then it would not be needed.

A3. *The blower size would be determined by the size of the furnace and the specifications as given. We do not require a retort as it is normal air atmosphere inside the furnace.*

Q4. Does it need to be cylindrical, or is a larger box furnace acceptable?

A4. *Refer to the amendment above. A box furnace will not meet our needs.*

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
