This solicitation amendment 004 is to answer bidder's questions.

Question 1:

Can the delivery date be extended beyond March 31, 2016?

Answer 1:

No, March 31, 2016 is the firm delivery date, all deliverables must be delivered on or before March 31, 2016.

Question 2:

With regards to Annex A, requirement, Mandatory Specification 2.4 and Annex C, Technical Evaluation, Mandatory Technical Requirements 1.4: "The instrument must be functional without heaters, the built in components must be corrosion resistant."

Are you requesting a heated or non-heated All Weather Precipitation Gauge? As there is a heated gauge option that can also function without the heater turned on.

Answer 2:

Parks Canada require non-heated Automated Precipitation Gauges. The gauges will be powered solely by the battery charged via solar panel, therefore Parks Canada doesn't require the heaters. The gauge may have a built-in feature with a heating option but should be able to function without this feature when powered from the battery charged via solar panel.

Question 3:

With regards to Annex A, requirement, Mandatory Specification 2.6 and Annex C, Technical Evaluation, Mandatory Technical Requirements 1.6: "The instrument must have built in or add-on wind protector to provide reliable and wind-adjusted precipitation data. The add-on must be included if not built in."

Are we to provide a 4" diameter mounting post with the Wind Protector to mount the All Weather Precipitation Gauge and Wind Protector on? If a post is required which length would you like, 1 meter post or 2 meter post?

Answer 3:

The gauges will be mounted in various locations using different mounting options, therefore Parks Canada doesn't require the mounting posts. Therefore, the winning bidder should provide the Wind Protector with no mounting post.

All Other Terms And Conditions Remain The Same
