The purpose of this amendment is to do the following:

- 1) Question: Is it possible to find out if the duct work is insulated?

Answer: The exhaust duct will be removed as per the attached drawing, M1.1 Ventilation Demolition_1, (everything within the bubble is to be removed). The supply duct will be cleaned on the exterior only including the plenum wall on the east side of the range.

- 2) Question: The scope specifies a temporary shower. In order to meet this requirement we will need access to water and a drain.

Answer: The contractor will have to provide a portable facility to accommodate temporary washrooms and showers.

- 3) Question: Are there washroom facilities nearby that staff can use during the remediation?

Answer: No

- 4) Question: Will a security guard be required or is it acceptable to lock up the containment area when we are not there?

Answer: The RCMP will have a commissioner on site at all times while the contractor is working, the building will be locked and alarmed in the evenings, and the work site can be locked in the evening by the contractor if preferred.

- 5) Question: Is the drywall behind the deflection plates being removed or is it just being cleaned?

Answer: We feel that the drywall can be cleaned as with the other non-porous surfaces within the range. Any removal of drywall shall be at the discretion of the RCMP, unless removal is required to access an area that requires abatement. All other drywall may be cleaned in place. The contractor shall ensure that any areas where drywall is removed be sealed with poly sheeting in order to maintain full enclosure.
