---

This Amendment No. 003 is raised to incorporate Addendum #2.

Please see the attached Addendum #2.

**ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.**

The following changes in the tender documents are effective immediately. This addendum will form part of the contract documents.

---

## **DRAWING ASK 01**

- .1 Provide temporary removal, demolition and reconstruction of portion of existing fence and footings immediately south of the new canopy addition and new concrete paving slab as described in Drawing ASK 01 attached.

## **PHOTOGRAPH OF EXISTING FENCE**

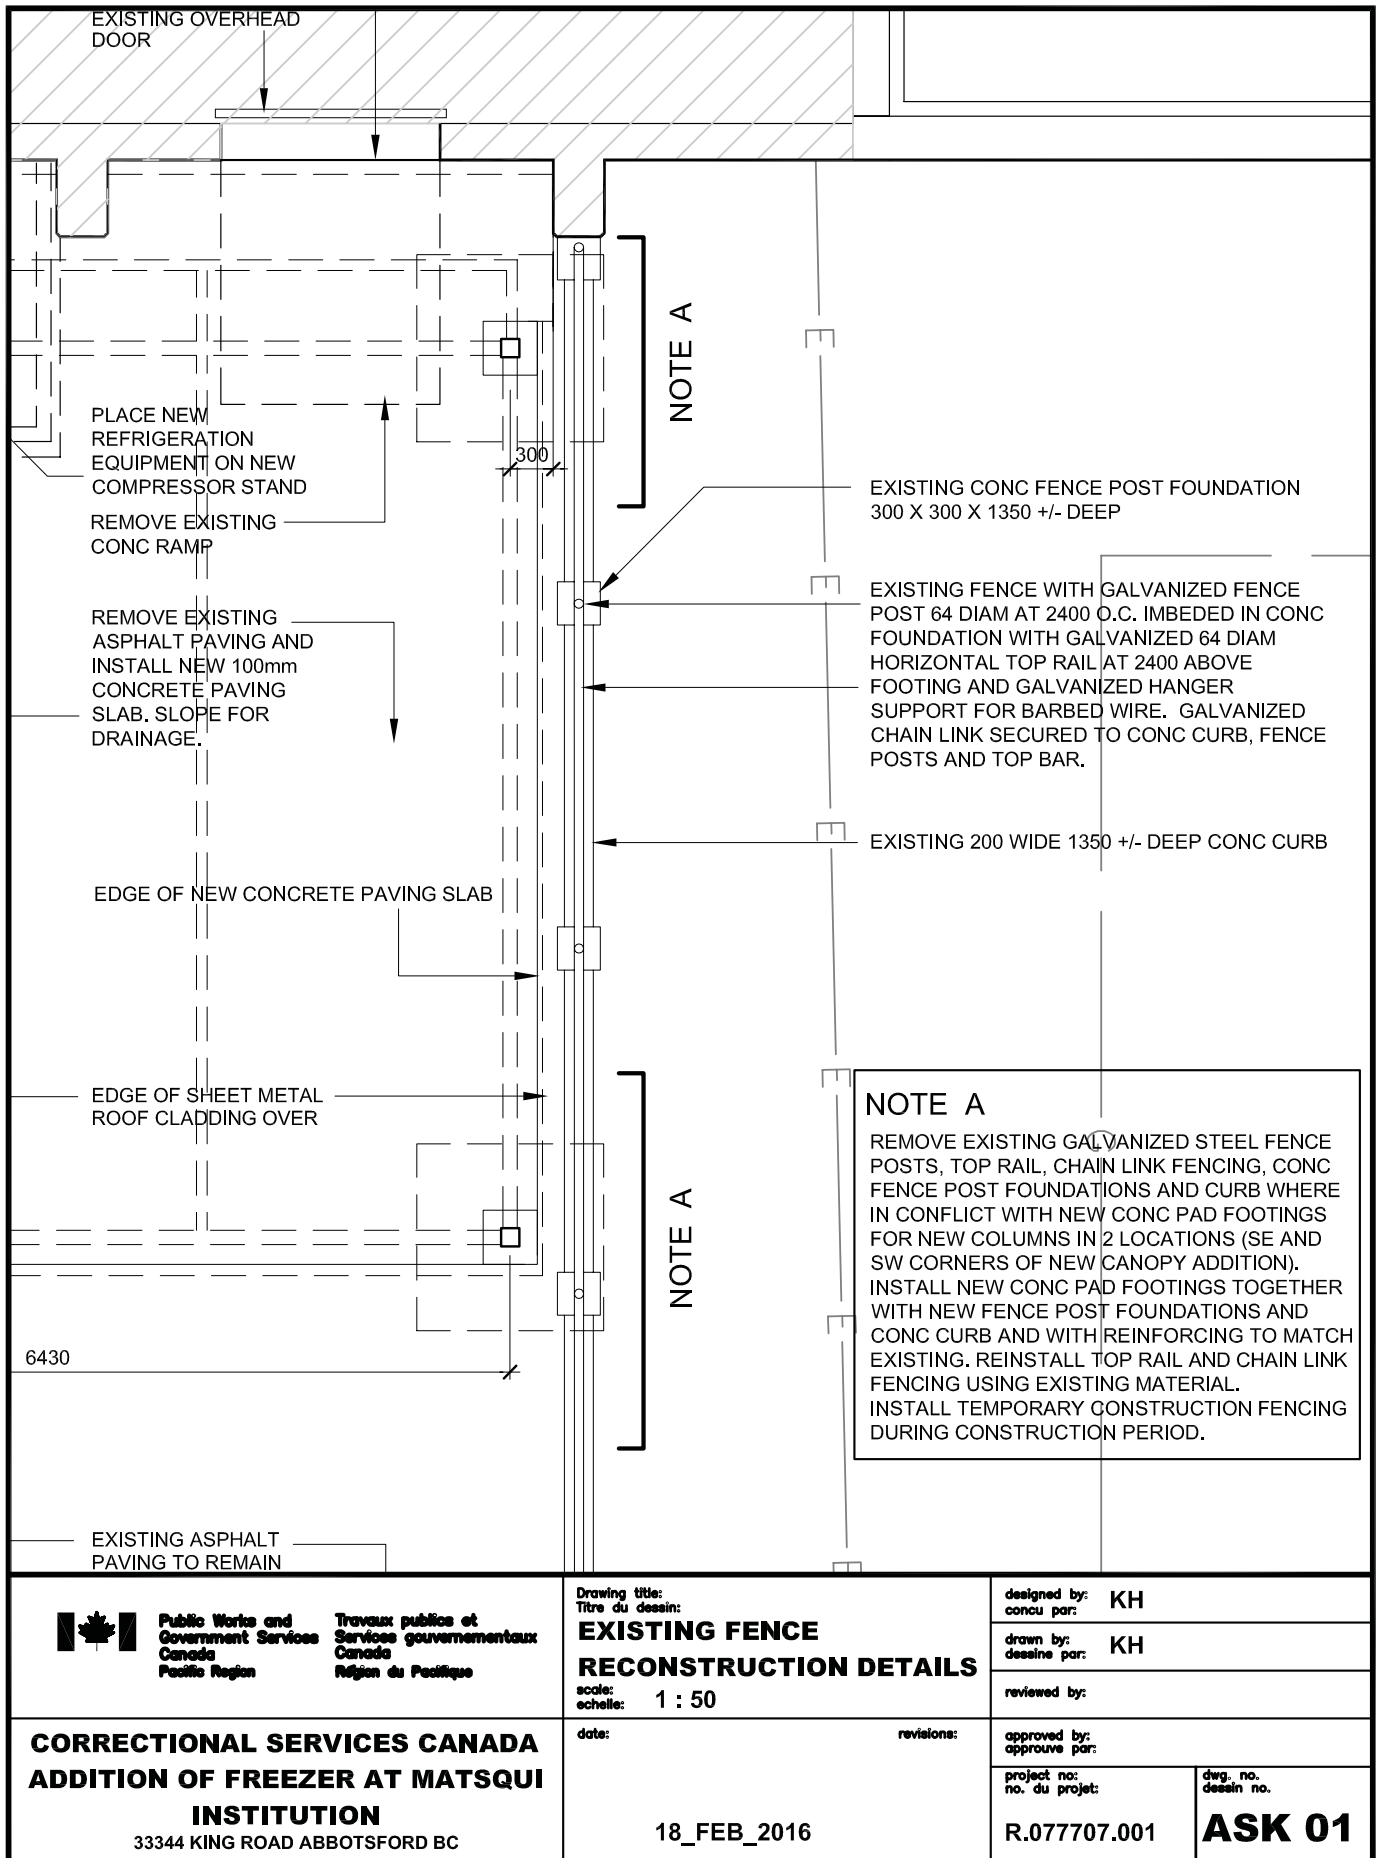

- .1 Contractor shall familiarize themselves with relevant conditions of existing building at the time of Tender. Photograph of existing fence attached for reference.

## **QUESTIONS AND ANSWERS**

- Q1 The addendum (#1) asks for the chain link fence on the south side to be removed and later reinstalled using new posts. We would need the height of the fence, size of posts and details regarding the installation given how close they are to the footings.
- A1 Refer to the instructions described in .1 of "DRAWING ASK 01" described in this ADDENDUM #2.
- Q2 It looks like the only painting that's required are the steel posts and beams that hold up the canopy. Is this correct? If so, will they be pre-primed and what is the paint to be used? Is any floor coating required inside the freezer? I.e. epoxy?
- A2 Painting is required where an item is denoted as "painted" in the drawings. It is required for all steel structural members for the new canopy addition, except those already galvanized. This include all the columns, beams, bracings as described in the Structural Documents as well as the new steel bent plate at the existing building wall shown in 1/S202. They will be shop primed as required in Sections 05 12 23 and 05 50 00 of the specifications. Paint to be used as described in Section 09 91 23 of the specifications. Sealer is required for the concrete topping inside the freezer. Ref 1/A501. Sealer as described in Section 09 91 .23 of the Specifications.
- Q3 Can you confirm the project requirements to work on this site? IE criminal record check, daily security check to move tools on and off site etc.
- A3 CPIC clearance is required. Tool inspection is not required. Tools need to be removed from the site at the end of each day.
