Reference Marker) for aviation fuel.

- b) Automotive Gasoline and Naphtha (Items 1, 2 and 13)

The unit prices offered in Annex "A" exclude all taxes or levies that may be or are imposed on the sale of petroleum products pursuant to any federal or provincial statute or regulation or territorial ordinance. However, where the Contractor is required by federal or provincial statute or regulation or territorial ordinance to collect from Canada, as a result of the sale of the product to Canada, except as otherwise provided in the Contract, Canada will pay to the Contractor an amount equal to such tax or levy where applicable and substantiated by invoice.

7.1.2 Adjustment Methodology – OBG

Basis and Calculation of Adjustment to the firm unit price for:

Automotive Gasoline and Naphtha (Items 1, 2 and 13)

The adjustment to the unit price will be equal to the applicable Montreal Reference Marker price for the week ending immediately prior to fuel shipment ("B" week value) minus the applicable Montreal Reference Marker price for the week ending **February 19, 2016** ("A" week value), plus the bid price.

If no Reference Marker "Oil Buyers' Guide" (OBG) Weekly Pricing and Data Supplement is published on a given Friday, then the Weekly Pricing and Data Supplement published immediately prior will apply.

For the purposes of determining the adjustment in unit prices, the average in the Canadian Unbranded Rack prices shall be used as follows:

Product as described in Annex "A"	Product as described in the OBG	Location
Automotive Gasoline, grade 1	Regular Unleaded	Montreal (Average price)
Naphtha	Regular Unleaded	Montreal (Average price)

The per litre "A" date value for February 19, 2016 is \$0.4555 CAD.

7.1.3 Adjustment Methodology - Platt's Oilgram

Basis and Calculation of Adjustment to the firm unit prices for Aviation Turbine Fuel (Jet B or Jet A-1) (Items 3 to 12 and 17):

The Reference Markers are:

NYHB - Platt's Oilgram average weekly assessment for the New York Harbor, FOB Barge, Jet. The average weekly assessments will be based on the Monday to Friday week average of the high and low daily assessments as compiled by Platt's Oilgram and made available electronically at the beginning of the following week from either GlobalView or PAWS.

USGC - Platt's Oilgram average weekly assessment for the United States Gulf Coast, Pipeline, Jet 54. The average weekly assessments will be based on the Monday to Friday week average of the high and low daily assessments as compiled by Platt's Oilgram and made available electronically at the beginning of the following week from either GlobalView or PAWS.

LA PIPELINE - Platt's Oilgram average weekly assessment for the West Coast Pipeline L.A., Jet. The average weekly assessments will be based on the Monday to Friday week average of the high and low daily assessments as compiled by Platt's Oilgram and made available electronically at the beginning of the following week from either GlobalView or PAWS.

An adjustment to the unit price will be calculated as indicated hereunder:

The adjustment to the unit prices will be equal to the applicable Platt's Oilgram Weekly Average Marker price for the week ending immediately prior to fuel shipment ("B" week value) minus the applicable Platt's Oilgram Weekly Average Marker price for the week ending **February 19, 2016**, plus the bid price.

If no Platt's Oilgram is published on a particular date indicated, the Oilgram published immediately prior to that date shall apply.

The per litre "A" date values for week ending February 19, 2016 for each Reference Marker are:

NYHB	\$0.3726 CAD
USGC	\$0.3518 CAD
LA Pipeline	\$0.3811 CAD

For Reference Marker "NYHB", "USGC" or "LA PIPELINE", the average weekly assessment will be:

- a) converted from U.S. funds to Canadian funds using the day average of the Bank of Canada official exchange rate for the corresponding day; and
- b) converted from U.S. gallon to litres using 3.785412 as the conversion factor.

The Reference Marker price converted to Canadian dollars per litre will be rounded to four decimal places to the nearest hundredth of a cent per litre (\$0.0001/litre). Not considering any resultant value in the sixth decimal place, the fifth decimal place will be rounded as follows: less than or equal to \$0.00004 rounded down, \$0.00005-\$0.00009 rounded up.

Example calculation using the "NYHB" Marker:

(All prices indicated are for example purposes only)

Related NYHB marker price for week ending January 15, 2016 = U.S. \$0.5123/U.S.Gal.
Related NYHB marker price for week ending February 5, 2016 = U.S. \$0.5298/U.S. Gal.
Bank of Canada official U.S. exchange rate for day ending January 15, 2016 = \$1.3871 per U.S. dollar

Bank of Canada official U.S. exchange rate for day ending February 5, 2016 = \$1.4072 per U.S. Dollar

Litres in a US gallon = 3.785412

A) $(\$0.5123 \times \$1.3871)/3.785412 = \$0.187723$ rounded to \$0.1877 Cdn per litre
B) $(\$0.5298 \times \$1.4072)/3.785412 = \$0.196949$ rounded to \$0.1969 Cdn per litre

C) B minus A) = increase of \$0.0092 per litre
