## CLARIFICATIONS:

1. In the Wood Treatment section part 3 Execution it says: Incise all timber materials prior to treatment. Does this include the round poles? **Round poles are to receive the treatment indicated. If this can be achieved without incising it would considered acceptable.**
2. The poles for this project cannot be incised (06 05 73-3.1) and natural peeled (amend #1 2.2). Incised logs must be milled to a uniform round dimension like a telephone pole to ensure proper penetration of incise and treatment.

**Delete sentence to 2.2.1 in its entirety. Replace sentence 2.2.1 with the following:**

**Remove bark from round poles by means of either natural peeling or milling. Ensure the method selected will allow for the proper application of the specified wood treatment.**
