This solicitation Amendment 002 is raised to provide the question and answer set 2 and to modify Article 2.2.2 of Annex "A" Statement of Requirement and Spec. Item # 2.2.2 of Annex "C" Statement of Compliance

Question and Answer Set 2

Question 1

Paragraph 2.2.2 states "maximum Sea Water inlet temperature of 32°C", however, paragraph 2.2.4 states "the Salt Water inlet temperature will be 29°C". Would like to confirm that 29°C is the correct Sea Water inlet temperature?

Answer 1

Article 2.2.2. of Annex "A" Statement of Requirement states that the cooler must remove 3025 Kw of heat even when the salt water inlet temperature reaches 32°C. To clarify the situation, at Article 2.2.2, the maximum Salt Water inlet temperature is modified to 29°C. See solicitation modifications below.

Question 2

Is an External Strainer required prior to the Sea Water Suction inlet?

Answer 2

No, an external strainer is not required. The strainer shall be as stated in Item #3.1 of Annex "C" Statement of Compliance.

1. At Article 2.2.2, Annex "A" – Statement of Requirement

Delete the article in its entirety and insert the following:

The heat exchanger unit must be capable to transfer from the Engine's Cooling Fresh Water a minimum amount of heat equivalent to 3025 kW with a maximum Salt Water inlet temperature of 29°C.

2. At Spec. Item # 2.2.2, Annex "C" – Statement of Compliance

Delete the criteria under Spec. Item # 2.2.2 and replace with the following:

The heat exchanger unit must be capable to transfer from the Engine's Cooling Fresh Water a minimum amount of heat equivalent to 3025 kW with a maximum Salt Water inlet temperature of 29°C.
