Amendment No.003 is being raised to allow for viewing of the Annex A Statement of Work by vendor representatives holding valid Reliability Status granted by CISD where the vendor holds valid security clearance at or exceeding DOS but does not have Document Safeguarding at the level of Protected B, to correct typographic error, to amend the scoring grid to ensure the scoring grid descriptions matches the technical point-rated criteria that it applies to, and to answer vendor questions.

Amendments to the RFP:

At Annex G, article 1.1.2 Point Rated Technical Criteria, Scoring Grid:

Delete: in its entirety.

Replace with:

Scoring Grid					
Point rated technical criteria R.2.1, R.2.2, R.5.1, R.5.2, R.5.3, R.6, R.7, R.8, R.9, R.10, and R.11 will be evaluated using this grid.					
0 No Response	1 Unsatisfactory	2 Poor	3 Good	4 Very Good	5 Excellent
No response provided.	Does not understand content or subject matter. Demonstrates clear deficiencies and gaps which could greatly influence service delivery. Addresses almost none of the elements of the criteria. Generally inferior submission: inappropriate; incorrect; elementary; weak; ill informed. The response is not complete in that it fails to address all the factors and only nominally addresses some factors; therefore, the response is considered to have very little merit.	Demonstrates a weak understanding of the subject matter. Demonstrates deficiencies/gaps in numerous elements of the criteria which could influence a portion of the service delivery. Does not adequately address the criteria elements. Does not meet expectations of the criteria. Non-pertinent/ inappropriate submission, inferior, frequent errors. The response is not complete in that it fails to fully address some of the factors; it is not clear or is incomplete; therefore, the response is considered to have insufficient merit.	Demonstrates a good understanding of the subject matter. Demonstrates only a few deficiencies/ gaps, but nothing that would be of great importance or affect the service delivery. Most of the criteria elements are addressed in a logical manner. Meets expectations for most of the criteria. Sufficient/competent submission, appropriate, efficient, well-founded. The response is complete in that it addresses in some detail each of the factors while providing some supporting detail for most of these factors; therefore, the response is considered on balance to have satisfactory merit.	Demonstrates a very good understanding of the subject matter. All elements of the criteria are addressed in a very logical manner (may have very minor deficiencies/gaps). Most of the criteria elements are well addressed in a logical manner. Meets expectations of the criteria. Very competent submission, consistent, qualified, strong, rigorous, solidly-founded. The response is complete in that it clearly addresses and provides some relevant supporting detail for each of the factors; therefore, the response is considered to have a good level of merit.	Demonstrates an excellent understanding of the subject matter. Far exceeds all expectations for all elements of the criteria. No deficiencies or gaps. All elements of the criteria are exceptionally addressed in an above average logical manner. Exceeds expectations of the criteria. Excellent submission. Demonstrates initiative in proposed solutions. The response is complete in that it addresses and provides exceptionally relevant supporting detail for each of the elements of the criteria; therefore, the response is considered to have outstanding merit.

Question and Answers

Q: We believe that our office space and personnel meet the requirements, and therefore expect to complete the Document Safeguarding Protected B registration process quickly, is there any guidance that you or your team can provide?

Our teaming partner was also suggested to register for the clearance, could you please advise if we were to centralize the project team in to our approved offices, would that permit us from avoiding the additional delay/risk of registering our "supplier/teaming partner"? Alternatively, we would look to respond as a sole entity.

We are one of the preferred operators of facilities around the world, and are currently involved in diverse transport, housing, defence, and other programs for the Government of Canada. Our team have recently completed projects which meet the scope of these works, including the largest immigration detention centre in North America, which we understand to be the second largest globally. We have a prepositioned detention centre which is rapidly deployable, and we believe our solution and experience represents a best value solution to your solicitation.

As a result of our delays due to registration of Protected B, and in consideration to the above and our ability to deliver value and compliance, we request an extension of 21 calendar days to complete the clearance processes, and a high quality offer for the Government of Canada. We fully appreciate that an extension has already been granted.

The Document Safeguarding security clearance at Protected B level and the Designated Organization Screening are both required for any office location that the Bidder is keeping a copy of the Annex A, Statement of Work.

In order to avoid delay due to time required to obtain Document Safeguarding at Protected B, please see amendment above regarding how Bidders holding DOS and Reliability security clearance may access the Annex A, Statement of Work. The extension request due to security clearance delay is therefore not granted at this time.

All other terms and conditions remain unchanged.
