Amendment 03

This amendment is being raised to extend the solicitation closing date and distribute bidder questions and answers submitted by email.

CLOSING DATE:

The closing date for tender 5P420-16-5013A, titled *TCH Clearing and Brushing - Yoho National Park*, is extended from April 5, 2016 until April 7, 2016 at 2:00PM Mountain Daylight Time (MDT).

A. BIDDER QUESTIONS:

Q5. Is the contractor responsible for surveying or ribboning boundaries of work areas?

A5. Refer to specification "31 11 00 - Section 3.1" for layout and flagging requirements along the roadway. However, areas delineated for clearing and brushing in the CP#2 and CP#3 drawing packages will not be the responsibility of the contractor to flag. These areas will be pre-flagged by a survey crew working under the direction of the Departmental Representative.

Q6. Is tracked equipment like Feller bunchers allowed on this job to cut trees?

A6. Determination of work methods and equipment are the responsibility of the Contractor, but must be in compliance with the specifications and project requirements. Otherwise, there are no specific equipment exclusions for performing the work.

Q7. Are mulchers with low ground pressure allowed to mulch debris and stumps or does it have to be chipped only?

A7. Determination of work methods and equipment are the responsibility of the Contractor, but must be in compliance with the specifications and project requirements. Otherwise, there are no specific equipment exclusions for performing the work. Note that regardless of the Contractor's chosen work method, the finished surface standards in "31 11 00 - Section 3.4" will have to be met.

Q8. Is the estimate of 800 cords of wood to be processed fairly accurate or Timber volumes are unknown?

A8. Estimating timber volumes is the responsibility of the Contractor.

Q9. Is the cutting up of wood to 16 inch lengths only to be done at the yoho pit?

A9. Cut merchantable timber shall be stockpiled in Niblock Pit in accordance with Amendment 1. The actual cutting of merchantable timber into specified lengths does not have to be performed at any particular location.

Q10. Can we use a processor to cut all firewood to specified length?

A10. Determination of work methods and equipment are the responsibility of the Contractor, but must be in compliance with the specifications and project requirements.

Q11. As for seeding in mechanically brushed areas, do we have to seed all areas brushed? or where ground was disturbed with tracked or tired machinery? Example just track marks or tire marks seeded? or the complete brushed area?

A11. Only areas with visible ground disturbance will require re-seeding and this determination will ultimately be made by the Departmental Representative. Therefore, the area of required re-seeding will be within the Contractor's control based on actual execution of the work.
