This amendment 001 is raised to extend the bid closing date from May 24, 2016 to May 31, 2016, and to answer the following questions:

Q1. 1.2 The description of the system does not include the stationary carriage that is 10'L x 30" deep that is shown on the drawing that is to hold the existing cabinets.

A1. We don't need a carriage. We're just looking for the floor to be levelled to the shelving height and then we'll put our existing cabinets on that floor.

Q2. 13.8 Indicates back stops should be included, but the drawing does not include back stops. Please confirm if this is **actually** required. The Specifications also ask for dividers. There are no dividers on the drawing. Please confirm that dividers are actually required.

A2. The back stop does not need to be slotted to accept dividers. Just a solid back stop to keep equipment sliding from one cabinet to the other. Dividers are NOT required.

Q3. 13.11 is asking for three dividers per side. This is not shown on the drawing. Please confirm if dividers are **actually** required in this application.

A3. Dividers are NOT required.

Q4. 15. Security - Please confirm that this requirement is actually required by the client. This requirement is ONLY for the storage of protected B files. This is NOT a file application. Please confirm.

A4. No security at all is needed. The shelving is going to be inside a vault, inside a building, inside a compound that is monitored by Commissionaires. Delete Section 15. Security Controls and Crown Regulations.

Q5. Mobile shelving fire protection design - "the fire protection requirements for mobile shelving when used in records storage" Please confirm that is actually required as this requirement is no longer applicable as per HRSDC. Nor is this a file storage application.

A5. Fire protection is not required for the same reason as security above. Delete Appendix 1, Mobile Shelving – Fire Protection Design Requirements.

All other terms and conditions remain unchanged.
