This amendment is raised to answer questions during the solicitation period as follows:

**Questions dated May 13, 2016**

- 1] Please advise the offloading of shipment at destination is to be included or not. Annex A Page 5 ( Row 7) is conflict with the statements on Annex A pages 1 through 4 reference - Shipping notes.
- 2] In Annex A, is it the intention for the heating units to heat a continuous flow, at the noted Maximum Flow Rates and temperature difference, of water in one hour?
- 3] Please clarify that only one heating element at the rated energy is desired for each Heater as shown in Annex A.

**Answers from questions dated May 13, 2016**

- 1] Offloading from the delivery vehicle is the responsibility of the supplier or the freight company as contracted by the supplier. Heaters should be on skids suitable for moving with a forklift by CanmetENERGY staff only after it has been removed from the delivery vehicle. If CanmetENERGY staff is required to offload equipment from the delivery vehicle, it will be done so under the liability of the supplier or freight company as contracted by the supplier.
- 2] The heaters must be rated for continuous duty at the specified maximum flow rate.
- 3] Number of heating elements is not fixed, only fixed parameters are approximate heater dimensions and total power requirement. Multiple elements may be used so long as the dimensions do not deviate substantially from the approximate dimensions stated in previous amendments and the total power requirement does not exceed the stated amounts given in Annex A.

All other terms and conditions remain unchanged.
