

This addendum is an integral part of tender documents and its content has precedence on every drawing, specification and documentation emitted to date.

All specifications and drawings emitted with ADDENDUM must be considered as part of tender documents. Modifications to specifications and drawings are numbered in order and are included in the appendix.

On every revised page of a given section, revisions related to the present addendum are identified by the revision number shown at the bottom of the page. Revision number appears inside a triangle in the margin in case of a partial revision and on the side of the section title when the whole page is added or revised in the present addendum.
