ADDENDUM TO REQUEST FOR PROPOSAL DOCUMENT  
FOR  
Moosomin Dam  
Service Contract No. 5  
Dam Safety Review  
REQUEST FOR PROPOSAL # 4547:928-7P11-0-S1-5

Addendum No. 2

Q&A:

The RFP states that “AAFC will submit an application for Aquatic Habitat Protection Permit to Saskatchewan Ministry of Environment for the relevant portions of this project”

Q1 - Can we interpret this to mean that the consultant will have no involvement in obtaining the Aquatic Habitat Protection Permit?

A1 - Correct, however the consultant shall follow any recommendations or regulatory requirements identified in the permit.

Q2 - Other permitting or review requirements that may be required include a Temporary Drainage Approval from the Water Security Agency to de-water the Project area, and regulatory review under the federal Fisheries Act to confirm the Project will not cause Serious Harm to Fish under the Act. Should we assume this will be the consultants responsibility?

A2 - No de-watering is anticipated for this project. The reservoir will be lowered slightly (approx. 300mm) to facilitate access to the spillway. AAFC will be responsible for all activities necessary for managing the reservoir level including regulatory approvals.
