**ADDENDUM NO. 2
TO THE
CONTRACT SPECIFICATIONS
FOR THE MIETTE HOT SPRINGS
WASTEWATER TREATMENT PLANT UPGRADES
JUNE 2016**

To All Bidders:

June 17, 2016

The following changes, additions, and/or deletions are hereby made a part of the Contract Specifications for "Miette Hot Springs Wastewater Treatment Plant Upgrades Contract Specifications" as fully and completely as if the same were fully set forth therein:

1 Drawings

1.1 DRAWING M-06 – MECHANICAL SITE PLAN AND SECTIONS

- .1 Please replace existing M-06 with the drawing provided in Addendum 2; M-06 with clouded mark-up.
- .2 The portion of all chemical piping outside the building and underground (15-AL-E4 and 15-SHDS-E4) should be replaced with double-walled FPA tubing of the same size.
- .3 The PFA tubes shall be enclosed in a 4" CPVC conduit for damage protection. The conduit shall be insulated and heat-traced. All 90 degree bends shall be replaced with 45 degree bends (including lateral and vertical bends). The conduit shall have a 45 degree wye fitting at the point where each chemical line rises above the ground. At this point, the PFA tubing shall become the original CPVC pipe and the CPVC pipe should be insulated and heat-traced.

1.2 DRAWING S-05 – STRUCTURAL TYPICAL DETAILS

- .1 Drawing S-05 – The lean mix concrete reference should be changed to "fillcrete" as identified in the specs (03 30 00).
