2	Business Process Catalogue	1
3	Business Use Cases.....	2
4	Supply Materiel Services.....	3
4.1	Specification and Model Documents	3
5	Known Issues.....	3
6	Document History	4

The information being provided is to illustrate the model that exists for business processes and information exchange within the Performance Based Contracting (PBC) solution for the Department of National Defence. The information is provided to facilitate an understanding of the business architecture and the solution architecture that exist for the PBC program. The content is not intended to reflect the end state specifications for all of the PBC EIE related services.

1 Introduction

This document defines a complete list of configuration items and their versions in the EIE Supply domain to be included in Navy Request For Proposal (RFP) packages.

This list of configuration items match the Canada EDE baseline **SUPPLY-2015-11-17**

Each service in the business domain is independent and stand-alone with all configuration items delivered in one package. It is important to understand that the services do not share any technical artifacts in a runtime mode. For example – even though two services both use a technical artifact called “Time.xsd” the version of “Time.xsd” used by each service may be different.

Thus the unit of configuration item for a Supply Service is the individual service itself as defined in section [Supply Materiel Services](#)

1.1 Change List

This section identifies which services in the Supply business domain have changed since the previous release.

- **Addition of Service Specifications**

*Note1: The configuration items changed in this release are identified using **bold format** in the tables containing the list of configuration items.*

Note2: Going forward the course grained configuration items will be at the level of the services as grouped in section [Supply Materiel Services](#)

2 Business Process Catalogue

Annex M - Navy Supply Process Model	1.0
-------------------------------------	-----

The information being provided is to illustrate the model that exists for business processes and information exchange within the Performance Based Contracting (PBC) solution for the Department of National Defence. The information is provided to facilitate an understanding of the business architecture and the solution architecture that exist for the PBC program. The content is not intended to reflect the end state specifications for all of the PBC EIE related services.

3 Business Use Cases

BUC_3_41_Navy_Part_Demand	1.0
BUC_3_42_Navy_Part_Demand_Response	1.0
BUC_3_43_Navy_Part_Issue	1.0
BUC_3_44_Navy_Part_Receipt	1.0
BUC_3_45_Navy_Part_Return_Issue	1.0
BUC_3_46_Navy_Part_Return_Receipt	1.0
BUC_3_47_Navy_PackUp_Kit_Issue	1.0
BUC_3_48_Navy_Inventory_Replenishment	1.0
BUC_3_49_Navy_Usage_Report	1.0
BUC_3_50_Navy_Inventory_Report	1.0
BUC_3_51_Navy_Part_Request_Report	1.0
BUC_3_52_Navy_Supply_EMR	1.0

The information being provided is to illustrate the model that exists for business processes and information exchange within the Performance Based Contracting (PBC) solution for the Department of National Defence. The information is provided to facilitate an understanding of the business architecture and the solution architecture that exist for the PBC program. The content is not intended to reflect the end state specifications for all of the PBC EIE related services.

4 Supply Materiel Services

Supply Materiel services have been divided into sub-sections. Each sub-section contains a list of the relevant Service Specifications, Operational Model, and Technical Artifacts for the service. Each service and its list of configuration items is independent of any other service.

4.1 Specification and Model Documents

MaterielManagementServiceOperationalModel	1.8
Navy_Inventory_Replenishment_Service_Specification - External	1.0
Navy_Inventory_Report_Service_Specification - External	1.0
Navy_Pack-Up_Kit_Issue_Service_Specification - External	1.0
Navy_Part_Demand_Response_Service_Specification - External	1.0
Navy_Part_Demand_Service_Specification - External	1.0
Navy_Part_Issue_Service_Specification - External	1.0
Navy_Part_Receipt_Service_Specification - External	1.0
Navy_Part_Request_Report_Service_Specification - External	1.0
Navy_Part_Return_Receipt_Service_Specification - External	1.0
Navy_Part_Return_Service_Specification - External	1.0
Navy_Usage_Report_Service_Specification - External	1.0

The technical runtime artefacts will only be shared following the awarding of the contract and at the appropriate design/implementation gate as per the contract milestones.

5 Known Issues

There are no known issues with the Supply business domain at the current time.

The information being provided is to illustrate the model that exists for business processes and information exchange within the Performance Based Contracting (PBC) solution for the Department of National Defence. The information is provided to facilitate an understanding of the business architecture and the solution architecture that exist for the PBC program. The content is not intended to reflect the end state specifications for all of the PBC EIE related services.

6 Document History

Revision Number	Description	Date (YYYY-MM-DD)
1.0	Delivery of SUPPLY-2015-10-14 baseline	2015-10-14
1.1	Update to SUPPLY-2015-11-17 baseline	2015-11-17

The information being provided is to illustrate the model that exists for business processes and information exchange within the Performance Based Contracting (PBC) solution for the Department of National Defence. The information is provided to facilitate an understanding of the business architecture and the solution architecture that exist for the PBC program. The content is not intended to reflect the end state specifications for all of the PBC EIE related services.
