Solicitation Amendment #02

I. The following questions were posed by industry:

Q2: In which spatial resolution must the orthophotos in actual color and near infrared (NIR) (of the land and the coastal zone) be supplied? It is indicated high resolution in the RFP, but there are no scale or pixel size.

R2: Imagery shall be captured with a pixel size of 20 cm Ground Sample Distance (GSD) or better, and the orthophoto mosaic shall be produced with a pixel size of 20 cm or better.

Q3: In the RFP it is indicated that ground stations and control point have to be included and they will be used through the time. Are the Ground Control Points permanent or temporary?

R3: Ground Control Points can be permanent or temporary, this is up to the vendor.

Q4: Are the points provided by the client or should we establish and maintain them over time?

R4: The points are not provided by the client and they do not need to be maintained over time.

II. For further clarification, the following changes have been made to the solicitation document:

At Annex A, para 3.5:

Add: Imagery shall be captured with a pixel size of 20 cm Ground Sample Distance (GSD) or better, and the orthophoto mosaic shall be produced with a pixel size of 20 cm or better.

All other terms and conditions remain unchanged.
