**Additional Questions to Industry**

Industry response to the following questions is requested by July 19, 2016 at 12:00pm EDT.

1. Approximately how much time would be required for the completion of a tiled mosaic as described in Section 2.2.1.14 of Attachment 1 to the RFI?
2. Could you describe your inventory of imagery of the North? Information should include the amount of coverage of Canada North of 60 degrees (either number of images, km<sup>2</sup> or % of coverage), image type, sensor, look angle, peak-of-season, and currency (age).

Responses could be provided in the form of a shapefile detailing your current coverage of imagery that meets the following criteria: north of 60, south of 60, peak of season definition from SOW, nadir, and cloud cover. Alternatively, could you provide a shapefile with these parameters (image date, nadir, cloud cover) as attributes to the coverage polygons?

3. If Canada does not ask for the Standard Imagery and Full Imagery to be distributed as part of the Open Imagery of Canada, would this modification to the requirements have an influence on the price of the Open Imagery of Canada?
4. Canada is considering a type of licence agreement in addition to Appendix B that would allow Licensee Governments to expose the imagery to the public for viewing only, without the possibility of downloading. Would this be possible and at what cost?
5. Would it be possible to have a separate class of licensees for not-for Profit Non-Government Agencies, such as Ducks Unlimited, Federation of Canadian Municipalities, and Canada Water Resources Association?
