The purpose of this amendment is to:

1. Address questions posed concerning the solicitation.
2. Make changes to Appendix B – Basis of Payment.
3. Add Security Requirements Checklist (SRCL) to Appendix C
4. Correct the error codes in certain documents.

1. Response to questions raised during solicitation:

Comments Received Table -1: RFP Questions and Answers – Set #1

Q #	Document Reference	Section Reference	Question / Comment	PSPC/RCMP Response
1.	RFP main pages	Appendix H	Is it possible to get an editable format of the APPENDIX H: REQUIREMENTS TRACEABILITY MATRIX, preferably in Excel	A copy of the RTM in word format can be provided. Excel will not be used for the RTM.
2.	RFP main pages	SRCL	I don't see Appendix C SRCL, but I believe that this is a GoC document that we have completed numerous times, is this a standard document that is downloaded from the buy and sell website? This is the one that I downloaded, is it a standard form for all GoC procurement?	The SRCL will be included in a subsequent Amendment to the solicitation.
3.	Multiple References	Multiple References	I am writing to request an 8-week extension to the closing date for the Auto Fingerprint ID System Solution that was released on 4 July 2016. This extension would reduce Canada's risk by allowing bidders to complete two different categories of activities. The first is responding to Canada's need for a COTS solution; the second is responding to the numerous changes that were made between the draft RFP and the RFP.	<p>The solicitation has just been posted and the posting period was for 45 days instead of the required 40. Therefore, we do not see a need to extend the closing date at this time. That decision can be re-evaluated once the bidders have had the opportunity to review the requirement and their proposed response.</p> <p>To assist the bidder's proposal preparation, we have provided a copy of the RTM in editable word format. As well, the RTM mitigates</p>

Q #	Document Reference	Section Reference	Question / Comment	PSPC/RCMP Response
			<p>A COTS Solution</p> <p>The RFP indicates Canada's preference for a COTS solution. Specific points are awarded for delivering on this. However, bidders must also balance this preference against the more than 3,000 requirements described in the RFP. Significant analysis that is required by bidders to ensure their solution meets the requirements and design work must be done where there is uncertainty. In addition to the requirements in the SOW, the supporting technical documentation and plans such as the AFIS Renewal Implementation Plan, Acceptance Test Plan, Acceptance Test Report, System Design Document, as well as the Data Conversation Strategy and Plan, all require considerable attention to ensure that Canada receives as low risk an implementation as possible.</p> <p>If no extension is approved, Canada will experience higher risk that bids would not meet one or more of these requirements and could be deemed non-compliant. If an extension of fewer than 8 weeks is approved, some risk</p>	<p>the risk to a non-compliant bid by providing a mandatory requirements declaration signatory form and a convenient list of requirements that can be responded to.</p> <p>A COTS Solution</p> <p>This same comment regarding the COTS solution was included in the RFI comments and the response posted 2016-06-28 addressed this comment. Please refer to comments #338, #349, #361 and #362. To reiterate, the RCMP's understanding is that there is no customization required for the benchmark system as this is intended to be a COTS solution and no COTS customization should be performed by the Bidder for the Benchmark.</p> <p>The RCMP prefers a base AFIS solution that is as much COTS as possible and wants to benchmark the Bidder's COTS product. This also allows the RCMP to obtain future generic COTS product improvement without specially designed RCMP solutions.</p> <p>Based on the RFP documents, there are less than 1400 requirements, not 3,000, (1385 requirements in the RTM and a few additional requirements stated in</p>

			will be mitigated but the risk of non-compliance would continue to be medium-to-high. Furthermore, bidders may not have sufficient time to ensure that the functionality can be provided by their COTS product in the bidding window and the bidder may have to propose more design work than otherwise would be necessary and potentially increase costs and technical risk.	<p>Attachment 2 to Appendix G (e.g. Project Documentation and Corporate experience). Please refer to the Appendix H (RTM).</p> <p>Concerning the supporting technical documentation and plans. The bidder has identified the Acceptance Test Plan (ATP), Acceptance Test Report (ATR) and System Design Document as supporting technical documentation. Please refer to comment #265, concerning the RFI, posted 2016-03-16 which explains that the ATP is not required for the Bidder's proposal. The ATR is also not required for the Bidder's proposal. Please refer to the Schedule of Deliverables in the SOW (section 15.2) which shows that these documents are not required with the Bid proposal. They are required after contract award. Additionally, the expectation is that the Bidder would have generic System Design Documents (SDDs) or SDDs from previous proposals, that would be modified to support explaining how the COTS solution would be configured/changed to support RCMP requirements; consequently, as experts with their COTS solution the Bidder would be expected to make these changes relatively quickly.</p>

				<p>In order to comply with the mandatory requirements, it is expected that the bidder has previously performed an AFIS related conversion with international like NIST packets and an internationally recognized user management database; consequently, the Data Conversation Strategy and Plan is not expected to be a significant undertaking for the Bidder.</p> <p>The COTS product proposed by the Bidder should be such that they can provide a response as to how the COTS product currently supports the RCMP requirements and how the COTS product would need to change to support all the requirements identified in the RFP. The Bidder's financial proposal must identify the cost to satisfy the requirements. The Bidder's financial proposal must include all costs to deliver, implement and make fully operational the requirements, which will not be allowed to increase. That is, the Bidder's financial proposal must include the cost to support all mandatory requirements as well as all rated requirements for which the Bidder has agreed to provide in the proposal based on the rated criteria, with no increase in cost to Canada.</p>

Comments Received Table -1: RFP Questions and Answers – Set #1

Q #	Document Reference	Section Reference	Question / Comment	PSPC/RCMP Response
			<p>Changes between draft RFP and RFP</p> <p>Bidders welcome the opportunity to comment on the draft RFP and make recommendations. However, when significant changes are made between a draft RFP and what is released, additional time is required. Our analysis of the RFP has found that there are at least two significant changes from a costing perspective. The financial response now requires hardware configuration and associated pricing, as well as a ten-year maintenance term. Both of these are new requirements which require significant analysis in order to provide a professional response. In order to respond to these changes in a shortened window, bidders will need to build risk into the cost. Therefore, in the absence of an extension of 8-weeks, Canada could face increased costs.</p> <p>We would encourage Canada to consider an 8-week extension so as to lower the risk of this procurement and allow bidders to provide the best responses from which Canada may select.</p>	<p>Changes between draft RFP and Final RFP</p> <p>The changes made between the draft RFP and the final RFP published are not that considerable. Most of the changes were clarifications based on the RFI comments. As well, some requirements such SWGFAST and ACE-V have been eliminated to ease the requirement which provides the Bidder with reduced effort to respond.</p> <p>The ten (10) year maintenance term was included in the draft RFP and this table will be updated to better reflect that only the initial contract years will be included in the bid evaluation value based on a yearly maintenance and support cost. This yearly maintenance and support cost will apply to any optional contract years. This reduces the effort required to provide a bid and more clearly represents PSPC intention for this pricing element. Prices that are now requested in the RFP would need to have been determined by the bidder in order to prepare a financial proposal; therefore, the changes from the draft RFP is not considered reasonable justification to extend the closing date.</p>

4.	M7594-153234/E Request for Proposal	Request for Proposal Document Part 6 – Security, Financial and Other Requirements, 6.1 a, b, c Part 7 – Resulting Contract Clauses	At the time of bid closing is the Bidder required to have 6.1 a), b) and c) in place? The question is being asked because in Part 7, 7.5 it refers to Contractor not Bidder therefore do the security requirements need to be met as the Bidder or once the Bidder becomes the Contractor?	<p>As mentioned at industry day (December 2015) PSPC stated that they would initiate an organizational security clearance at any time for any potential Bidders. If any Bidder has not yet requested an organizational security clearance and they intend to submit a bid, then they should make the request to PSPC as soon as possible to ensure this can be completed prior to bid closing.</p> <p>Any Bidder's proposed individuals requiring access to classified or protected information must be able to meet the security requirements in Part 7 (i.e. pass the security clearance process for PSPC and RCMP). If the security requirements cannot be met by the proposed individuals a contract cannot be signed and the bid may be considered non-compliant. The security clearance for the proposed individuals will be completed on a priority basis as soon as the bids have been received.</p> <p>To ensure it is clear, an organizational security clearance is required at the time of bid closing (6.1 (a)).</p> <p>The Contractor personnel requiring access to PROTECTED information, assets or sensitive work site(s) must EACH hold a valid RELIABILITY STATUS</p>

Q #	Document Reference	Section Reference	Question / Comment	PSPC/RCMP Response
			In a more global perspective, could you clarify what are the deliverables to be provided with the bid (as a bidder) vs the deliverables to be provided after contract awarded (as the contractor).	<p>security clearance, granted or approved by CISC/PSPC before work on the contract can begin . The Bidder is encouraged to provide the proposed personnel names as soon as possible (prior to bid closing) to ensure security clearances can be obtained and avoid possible non-compliance or delays.</p> <p>Please refer to section 15.2 in Appendix A – SOW and Appendix G and its attachments for the minimum deliverables to be provided with the bid. However, please note that it is the Bidder's responsibility to provide whatever documentation necessary to ensure their solution is clearly articulated to enable PSPC/RCMP to effectively and efficiently assess their bid to determine compliance to the requirements.</p>
5.	ATTACHMENT 2 TO APPENDIX G: TECHNICAL PROPOSAL EVALUATION SUBMISSION TABLES	1.2, item 2	This list doesn't include a place for the RTM (for mandatory requirements). Could you please clarify where you expect to find this matrix in the response?	The RTM can either be included in Section 3 (Functional Requirements) or in Section 7 with a reference in Section 3 to the RTM in Section 7. Attachment 2 to Appendix G section 1.2 is intended to be as flexible as possible to ensure all aspects of the Bidder's proposal can be presented in the most effective and efficient manner while addressing all the requirements. The format in section 1.2 is preferred to ensure there is a consistent presentation of the information from all Bidders that

				allows PSPC/RCMP to effectively and efficiently review the bids.
6.	Annex F to Appendix A Government Furnished Equipment		We understand that it is possible to re-use hardware and software licenses. Can you confirm that this hardware/software will be available for the contractor at the moment of the contract signature (and therefore will not be used anymore on the current operational system)?	<p>Please refer to Appendix A – Statement Of Work, Section 4. This section explains which hardware and associated software will be available at the moment of contract signature. The availability of the other hardware is dependent on the Bidder's implementation approach; therefore, when additional hardware/software would be available can only be identified through the Bidder's proposal. Restating the content of Section 4 herein is not practical.</p> <p>Section 4 articulates that the current operational production system hardware/software will continue to be used until it is replaced by the Bidder's AFIS renewal solution; therefore, it will not be available at the moment of contract signature. One of the fundamental aspects, articulated repeatedly throughout the RFP, is that the current production AFIS must continue to operate until it is replaced by the AFIS renewal solution; otherwise, the RCMP would have no production AFIS capabilities. This was also explained in the industry day presentation (December 2015) with an animated step by step example of the parallel production operation of the current AFIS and renewed AFIS until the cut-over to the AFIS renewal solution. Please</p>

				This link contains standard procedures for change management. The key elements of the release process have been identified in the RFP (i.e. different environments and flow between environments prior to production release). If the Bidder want the information in this link, then signing a non-disclosure agreement is required before the information can be provided. Please let us know if a printed copy is required and we can arrange for you to sign a non-disclosure agreement.
11.	APPENDIX A: AFIS RENEWAL STATEMENT OF WORK	1.5.3, item 2	Could you provide RCMP/SSC current change management policy	Refer to #10 above. This is only available after signing a non-disclosure agreement.
12.	Appendix H Requirements Traceability Matrix	3.5	Requirement #4 concerns 65 reports that are organized in 18 categories. We feel that the current matrix structure is not adapted to providing a clear response. Is it possible to split this requirement row into 18 lines (one per category) in order to provide a clear and legible response?	To ensure clarity, it appears that the Bidder is referring to the Annex B to Appendix A table in Appendix H, section 3.5 Operational Reporting and Statistics. Attachment 2 to Appendix G, section 1.3 states "It should be noted that the Bidder may expand the tables to accommodate its response". Consequently, the Bidder is free to expand the tables to accommodate its response.
