*Amendment 003 is issued to provide Responses for the Questions Received*

1) At Table of Contents

Insert: Attachment 2      Questions and Answers

**ATTACHMENT 2  
QUESTIONS AND ANSWERS**

**Q4)** The route to cameras C-1 to C-9 from the server room exceeds 100 meters and requires POE extenders, which can be cumbersome and unreliable. The following solution is suggested:

- Place a POE switch (switch A) be placed in a suitable location middle of the corridor (preferable in security desk at CBB3-108)
- Connect this switch (A) by fibre to the client provided switch B at the server room CBA1B- B14B. If the client switch does not have SFP slots, please suggest a media converter.
- Connect cameras C1 - C11 along the corridor and cameras C12 and C3 in CBA 14 to switch (A).

Please confirm if this is acceptable.

**A4)** During the site visit 4 different CCTV nodes fibre connected to the core and equipped with PoE switches were identified to support new cameras within the distance limits of CAT6. See drawing CBMC-1.dwg provided by via PCSC.

- Kitchen node
- 4 Block node
- Strip control node
- SEG node
