The Government of Canada (GC) released the GC Information Technology Strategic Plan in June 2016, which includes key strategic actions for the adoption of Cloud Computing. Directly supporting this strategic action, the Government of Canada has now released the following three (3) documents for consultation: the **GC Cloud Adoption Strategy**, the **GC Right Cloud Selection Guide** and the **GC Security Control Profile for Cloud Services**. These documents have been developed following an extensive consultation process which has involved GC departments and agencies, provincial and municipal governments through the Public Sector CIO Council, and industry. As part of our ongoing stakeholder engagement process, the Treasury Board Secretariat is seeking further feedback on these new publications.
