

Amendment to Halifax – Refrigeration Maintenance and Repair Services (16-22029)

Revised Closing date: September 1, 2016

Mandatory site visit: August 18, 2016 at 14:00 ADT at 1411 Oxford St., Halifax, NS.

-Could you provide a list of equipment by site?

A sample list of the refrigeration equipment for Halifax and Ketch Harbour is attached spreadsheet. Please note that the maintenance is not limited to the listed items, assets are continually added and removed from the sites.

- Could we set up appointments to view/review the equipment at Oxford and Sandy Cove locations?

A mandatory site visit will August 18, 2016 at 2pm at 1411 Oxford St. No site visit will be scheduled for 270 Sandy Cove Rd as the equipment is similar to that at Oxford St.

- Regarding 10.4 under Appendix A, we have experienced personnel on the equipment, factory training is a challenge and not something we required in the past. We do not have issue taking any factory training that may be available. With that said, Convicon do have training available in October that we would take if we are awarded the contract. Revco (Thermo Fischer), I have contacted them twice on training and they have not responded. Ingersoll-Rand do not own Hussmann any more. Ingersoll-Rand/Hussmann to my knowledge and having worked there previously, may have internal training available to employees but do not offer any to external companies/contractors. Should this clause be amended in some manner to make it fair to all bidders?

Amended 10.4

10.4 The name of at least one (1) full time licenced technician that is factory authorized repair agent to service Revco (Thermo Fisher) and Convicon equipment. Documentation is to be provided with the submittal.
