Amendment No. 005

This amendment is being raised to provide responses to Requests for Clarification.

- Q1. The scope of work is difficult to define due to the significant differences in engineering costs and requirements between a rehabilitation and full replacement of the Main Dam. In order to ensure fair bidding amongst proponents, can PWGSC please provide clarification as to which option our pricing should be based on?
- A1. Base your price of the most expensive option.
- Q2. The Main Dam requires the construction of a control building to house the generator and electrical main control panel. Can PWGSC provide additional details of requirements for this building so that we can establish a clear scope of work?
- A2. The new control building should look similar in exterior appearance as the existing lock control building.
- Q3. Dam E states that the walls are anticipated to be refaced. However, it also mentions that due to the poor conditions, a replacement option is considered. As the cost of replacement and refacing are significant in pricing, can PWGSC please provide clarification which option our pricing should be based on?
- A3. Base your price of the most expensive option.
- Q4. Given the complexity of the project, the amount of coordination required amongst disciplines, and the amount of research required to establish a proper scope of work, is it possible to have an extension of time of **2 to 3 weeks** to prepare this proposal?
- A4. Due to operational requirements and scheduling constraints, an extension to the date for the receipt of proposals may not be granted at this time.

All other terms and conditions of the RFP remain the same.
