Description of Work:

The Department of Fisheries and Oceans requires the services of an Application/Software Architect, a Business Process Reengineering Consultant and a Database Analyst / IM Administrator to provide expertise and assistance in the areas of application design, implementation, integration, testing, deployment and maintenance in support of the National Online Licensing System, a highly customized application which allows the department to manage the commercial fisheries.

Duties will include but are not limited to the following:

- Capture and analyze client requirements.
- Track and resolve client reported incidents and problems.
- Assist IM&TS as required with application development and maintenance to improve system functionality.
- Test bug fixes and new releases.
- Architecture review.
- Implementation of IT security control functions.
- Assist Ecosystems and Fisheries Management (EFM) with identification and resolution of payment issues.
- Provide financial extracts to the EFM manager for review.

Task authorizations will be issued for all work on an “as and when required basis”.

- **The work is currently being performed by contracted resources**

Security Requirement: *Common PS SRCL #6 applies*

Minimum Corporate Security Required: *Designated Organization Screening (DOS)*

Minimum Resource Security Required: *Enhanced Reliability*
