Amendment No. 008

This amendment is being raised to provide responses to Requests for Clarification.

Q1. We would like to have some clarification regarding the Addenda 007.

We notice a contradiction in articles C) and D) of Section 1.10 of the addenda. It was indicated in article C) that the consultant should update the Operation manuals, and in D) it was indicated the consultant shall review the Operation manuals prepared by the contractor.

Qi. As the consultant cannot prepare ahead of time the Operation manuals for equipment which is going to be supplied at a later stage of the construction period by the contractor, please clarify accordingly.

Qii. Please clarify what is requested from the consultant in article F) of Section 1.10 regarding the first seasonable start-up.

A1. Ai. The Consultant is to review the Systems Operation Manual to ensure completeness, including any approved changes, modifications, revisions and adjustments made. It is the responsibility of the Contractor to produce the Systems Operation Manual (aka Operation and Maintenance Manual), including all changes, modifications, revisions and adjustments made.

Aii. The Consultant must be present on-site during the first seasonal start-up to evaluate the overall success of mechanical and electrical system that was commissioned upon construction completion. Consultant is to provide technical assistance for any difficulties and resolutions steps.

All other terms and conditions of the RFP remain the same.
