This amendment is issued to provide the following information:

1. Provide the following technical questions and answers.

Q1. Please confirm if we are able to utilise the existing wave absorption beach.

A1. Currently as the wave generator is a dry back design, there is no wave absorption beaches on the rear side of the wave generator, see attached drawings.

The new wave generator is a wet back design, the supplier must include wave absorption beaches on the rear side of the wave generator as part of their deliverables.

All other terms and conditions remain unchanged.
