SOLICITATION AMENDMENT # 3

THIS AMENDMENT CONSISTS OF QUESTION AND ANSWERS.

1. QUESTION AND ANSWERS.

Q1 - Is the owner willing to entertain cast in place for the new tunnel section versus precast concrete.

A1 - Not at this time. Please submit bids in accordance with materials specified in the tender documents.

Q2 - The existing asphalt walkway has to widen in order to accommodate heavy equipment such as dump trucks, excavators, and cranes. This road will have to be extended from gun placement 2 over pass gun placement 1 to facilitate the tunnel work on magazine 2 and 1. What type of finish landscaping is expected after work is complete. Presently the site consists of rocky outcrops surrounded by alpine flowers and low line native shrubs and marsh grass.

A2 - The existing asphalt walkway is approximately 3m in width. If required the existing wooden railing can be removed without the requirement for replacement. If additional width is still required the contractor must provide additional width for equipment at their own cost. Method of widening must be approved by the Departmental Representative before proceeding with work and all disturbances to the existing landscape are to be returned to the existing condition or better unless noted otherwise on the drawings. When completing landscaping the contractor must use existing soil/vegetation material as specified in the tender documents. During the course of the construction it is of the utmost importance that the existing bunker infrastructure be protected from damage and thus have no construction traffic travel over it unless it is deemed absolutely necessary and approved by the Departmental Representative. Access to the east and south side of gun emplacement #1 must be provided by a temporary construction access road specified on drawing C101 which is to be removed and then returned to the existing condition.

END OF SECTION.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
