**Landscaping and Grounds Maintenance Services at the Victoria Canadian Coast Guard
Base located at 21 Huron St., Victoria, B.C.**

**Services d'aménagement paysager et d'entretien des terrains à la base de la Garde côtière
canadienne de Victoria, située au 21, rue Huron, Victoria (C.-B.)**

Question#10

A further clarification concerning irrigation.

The Solicitation document says:

Tasks to be Preformed / *General Instructions* General landscaping services will include ...
irrigation installation, and repairs.

I can provide a cost for a basic spring start up and for a winterization, but it would be problematic to provide a competitive quote that includes cost for "installation and repairs". Problematic because I currently have no idea about the condition of the existing system, nor plans for future installations.

Is it acceptable to indicate that irrigation installation, and repairs outside of basic spring start up and winterization are to be covered under the "Change Management" section of the "Scope of Work"?

Answer #10

All start-up and winterization of the existing irrigation system will be addressed on a "as required" basis. All future repairs and maintenance to the existing system will be conducted separately from this service contract.
