

Att. 009

Questions and Answers

Q1. Can a trailing suction hopper dredge be used on that project?

A1. Yes. See Addendum No. 001

Q2. Are navigational maps available? Is PWGSC going to provide them?

A2. The information supplied in the contract documents, regarding the dredging location information, is the industry normal and is used by both the U.S and Canada, who share information regarding dredge locations and data on the Great Lakes Seaway.

Other survey information will not be supplied by PWGSC for the project. No other type of survey information will be allowed to be used on this project.
