Amendment 002 is raised to answer the following questions:

Question 1

Item #21: In the French version it is indicated that there is a requirement to deliver the items on "plates-formes". Does this simply mean items to be crated on wooden pallets? Or does that mean that we have to fix the compressor system on a metal base?

Answer 1

The required crating is for shipping purposes only.

Question 2

Item #22: Requirement for operation certifications. Kaeser Compressors offers a standard QA test certificate for each compressor that is manufactured. Is this sufficient or is there additional certifications required.

Answer 2

A standard QA test certificate is sufficient.

Question 3

Item #25: Requirement for site assistance during installation/start-up/commissioning which will be executed by others. The French version states that site assistance is required for 6 hours or normal operation. Does this mean that installation/start-up/commissioning will be done by another party, and our assistance is required at time of operational testing. (having a Kaeser technician available) during that operational testing to ensure that everything is running properly?

Answer 3

Installation will be done by Natural Resources Canada. Initial start-up, commissioning and operator training is required to ensure proper operation of the equipment.

All other Terms and Conditions remain unchanged.
