

**CCGS 1100 Class Propulsion Renewal**

**Q9.** Does the Baseline sea trial need to be completed for every ship or only the first ship? If a baseline sea trial is required for every ship, do we need to do a harmonic analysis each time? Can we assume that there is no baseline sea trials and baseline harmonic analysis for the CCGS Harvey?

**A9.** A baseline sea trial shall be conducted for each ship as the contract is issued for the respective vessel. The harmonic analysis for each vessel shall also be conducted at that time. In the case of the Ann Harvey, a baseline sea trial cannot be completed nor can the harmonic analysis. The Sir William Alexander data will be used to approximate that for the Ann Harvey.

**Q10.** Do we need to include wharfage and dock fees in our calculations?

**1029 07 (2010-08-16) Wharfage and Dockage Fees and Charges**

1. Until the completion of the Work, the Contractor will be responsible for and must pay all charges, fees, expenses and disbursements of or incidental to the carrying out of the Work, including wharfage, towage, dockage, running lines, electric light and water for testing and refilling the tanks.

2. In the event of any assessments, taxes or duties, or other levies and charges whatsoever, being unpaid after the Work has been formally accepted by Canada, and Canada has complied with all the provisions imposed upon it by the Contract, the Contractor must reimburse Canada within thirty (30) days thereafter for any such assessments, taxes, duties, levies or charges as may have been paid by Canada

**A10.** The work associated with these installations will be completed alongside the applicable CCG bases. Vessel husbandry will remain with CCG. There will be no wharfage / docking fees for all work completed at CCG bases. The successful bidder will be responsible for all expenses related to the Contractor work and all related subcontractor work.

**Q11.** Can you confirm that another 1100 Class ship will be available for the CCGS Harvey Baseline Sea Trials. Would we be required to do a Harmonic Study as a part of the baseline sea trials as well?

**A11.** Refer to response for Question 9.
