

SEN-013 16/17 – Sheer Panels and Draperies
Questions and Answers – Set 4
October 3, 2016

8. The roller shade that is being used as an example is 143" x 110". Is this to be motorized or split in 2 as a manual operated shade? In our experience this is outside most limits of a manual shade. Can you clarify please?

Answer: The roller shade is not motorized and would be split in 2 as a manual operated shade.
