Question #1

In the Business Rules it discusses a custom BREX DM –"CT142-A-00-00-00-00A-022A-D" but it was not provided since it is part of the CSDB. It must be noted that the Bidder can do the changes but cannot verify the XML against the custom BREX DM without access to it. It is assumed that the BREX DM is used to validate the XML before its processed into their IETM, the Bidders were sent the IETM deliverable (compiled). Should we validate the DMs with the S1000D 2.2 default BREX?

Answer #1

For exercise purposes, the use of the default BREX is fine.

Question #2

An OPI/LCMM/DND Serial number was not provided in the DND570 – what is the Bidder to use? What is the Bidder to use for the issue date of the DND570 for insertion into the attribute <issdate>?

Answer #2

There is no requirement for a document serial number for this exercise.

Question #3

Is a change register used? If so is the Bidder to create one or will it be provided in an amendment to the sample IETM?
Answer #3

There is no requirement for a change register for this exercise.

Question #4

If ICN naming convention isn't used for MY and DW pubs, what convention is used for version control?
Answer #4

NDID; National Defense Index of Documentation

Question #5

Is there documentation on specific settings to export CGM graphics (aside form CGM V4 webCGM 1.0)? Is there documentation to support the CGM XML companion file required for wire interactivity?

Answer #5

No.

Question #6

Are previous changes retained for all modules? Is deleted content retained for all modules? If so, is the process documented/well defined?

Answer #6

Previous IETM versions are retained and archive for future reference.

Question #7

Is it required for us to generate a highlights module?

Answer #7

Not required for this exercise.

Question #8

See below excerpt from the provided BR on page 11 – Questions are in Bold:

o The project uses the change attributes where these attributes are present in markup to indicate a change to a complete element and uses the <change> element when the change is inline in the text.

o The attributes "change", "level" and "rfc" on elements that allow these attributes to indicate a change are defined as follows:

o The attribute "change" uses one of the predefined values "add, modify or delete" to indicate the type of change.

o The attribute "level" is used to indicate the change number or level. – Question – there is a previous change in one of the XML DMs but the attribute "level" was not input. Is the Bidder required to enter the "level" and what change level would this be? "002"? Please confirm.

o The attribute "mark" is used and the number "1" is entered. When set to 1, the style sheet displays the change color, mouse over of RFC, date and type.

o The attribute "rfc" is used to indicate the change driver (i.e. DND 570 number). See question 2 above.

Solicitation No. - N° de l'invitation	Amd. No. - N° de la modif.	Buyer ID - Id de l'acheteur

Client Ref. No. - N° de réf. du client	File No. - N° du dossier	CCC No./N° CCC - FMS No./N° VME
W7006-16P002		

Answer #8

Not required for this exercise.

Question #9
The Bidder's understanding from the onsite meeting in June was that the current CT142 IETM was to be used. Bidders were "NOT" to provide another COTS S1000D Viewer - they were going to be provided the CT142 IETM that is currently in use. Is this still correct? From the sample received it appears that way.

Answer #9

The IETM version provided within the CD is to be used.

Question #10
It was stated at the onsite meeting the style sheets, scripts etc will be provided to the Bidders. From these provided style sheets/scripts, the Bidders are to create their own version CT142 IETM. (the exact replica of the sample IETM provided) Please confirm.

Answer #10

Bidders are not required to create their own version but to amend our version.

Question #11
For the DND570 for the C-12-142-000/DW-001:
The following illustration change is required for Chapter 32-30-00, Fig 1, Sheet 1.
"Install 50 ohm resistor between Connector P2, Pin N and Connector B (PSEU), Pin 58. This would be applied to the Schematic Diagram (CT142-A-DW-32-30-00B-001A-A), Sheet 1/3. "

Sub-question 1 – Is there a resistor designator to be used, ie. R1, R2 etc.?

R1 will work; the standard designation for resistor is R with a sequential number.

Sub-question 2 – Is this change to be applied to the Wiring Diagram (CT142-A-DW-32-30-00A-001A-A) (Sheet3/6) also, and if so on which wire is it to be placed? 3261-79B22 or 3261-79A22?
Answer #11

The instructions are provided within the provided DND 570 and there is no reference to the above wires.

Question #12
What is the software currently used by the contractor for authoring hard copy (paper) publications and creating PDFs?

Answer #12

The software is the Contractors choice, as long as the end result is achieved.

Question #13
We did not receive the Standard Aero Technical Services document on the first CD or on the revised CD. Will this document be provided to bidders?

Answer#13

No, not required.

Question #14

Can you please confirm that the DTS Search tool is not part of the sample IETM that the Bidders are to submit?

Answer#14

There is no requirement for the DTS Search tool as part of the sample IETM.

All other terms and conditions remain the same
