

CCGS 1100 Class Propulsion Renewal

Q12. Clarification requested on Question 3 as posted previously – Does this response state a “turn-key” installation requirement.

A12. The intent of this solicitation is to provide the CCG with a supply and install contract. The successful Contractor shall be required to contract all sub-trades to complete the removal and subsequent installation of the new equipment as responsibilities have been outlined in the Request for Proposal and sections 1.1.4.1 and 1.1.4.2 of the SOW. CCG will retain custody of the vessel and oversight of the installation as the client.
