**This amendment has been raised to answer the following questions:**

Q1: The requirement for painting a fume hood is not a common one, and would like to know the chemical used in these fume hoods that require stainless steel to be painted.

A1: The painting of the fume hood is only the exterior of the cabinet. Unfinished stainless steel interior liner is acceptable.

Q2: What percentage of the unit has to be painted/powder coated, only the interior or the whole unit.

A2: Powder coated exterior.

Q3: A site visit to the laboratory would be very good to understand the overall requirement and make possible recommendations.

A3: Pictures will be provided in lieu of a site visit.

Q4: I wanted to ask if hoods made from polypropylene would be considered by the end user?

A4: No.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME AND IN FULL EFFECT**
