**THIS AMENDMENT IS ISSUED TO ADDRESS THE FOLLOWING:**

**ANSWERS TO QUESTIONS**

Question 5:

What is the definition of the P3 procurement for this particular project? What are the Roles of each stakeholders?

Answer 5:

P3s are a long-term performance-based approach for procuring public infrastructure where the private sector assumes a major share of the responsibility in terms of risk and financing for the delivery and the performance of the infrastructure, from design to long-term maintenance.

The P3 procurement for the DND Project shall be a competitive selection process to identify a consortium that will design, construct, finance, operate and maintain the infrastructures required by the Project for a predetermined contractual period.

The list of stakeholders is presented in sections 3 ***ROLE OF THE ADVOCATE ENGINEER***

- Advocate Engineer;
- Independent Engineer;
- Private partner;

and 7.14 ***INTERACTIONS WITH THIRD PARTIES*** in the Terms of Reference:

- Representatives of federal, provincial or municipal regulatory authorities;
- Non-profit or community organizations;
- Owners of a site concerned by the mandate or the TCEVC-PMW Project;
- Contractors and consultants other than those designated as being part of the AE team under this mandate;
- Any civic association;
- Members of the public.

Question 6:

What it is in for the Private Partner (PP) in this procurement structure? Are there any performance payback incentive for the PP?

Answer 6:

The P3 procurement will result in a firm, fixed price contract between the sponsor and proponent for the project. The P3 proponent will be subject to performance deductions should predefined performance requirements not be met during the course of the operating period.

Question 7:

Who is taking the environmental risk since the design will be partly done by the AE?

Answer 7:

Section 5.1 of the Terms of Reference outlines the specific activities required of the Advocate Engineer.

Question 8:

What is the water treatment discharge criteria to meet before discharging to the Jacques-Cartier River?

Answer 8:

The discharge criteria will be determined by the sponsor over the course of the Project's development.

Question 9:

Will the Private Partner (PP) have flexibility to design his own system or be able to upgrade the preliminary design of the AE?

Answer 9:

Innovation and the potential for design flexibility is inherent in the P3 procurement process, subject to predetermined design and construction requirements that may be stipulated by the sponsor.
