Bidders' Questions and Responses from Canada

Question 22: Under which class was purge water disposed during previous monitoring events?

Response 22: No analysis required, It's stated in the SOW that the purge water is to be disposed of at a licenced disposal facility. The wells that are being sampled have exceedances, so the purged water will likely be contaminated with all the contaminants of concern. For waste characterization purposes the consultant can send the analytical data from past sampling events to the disposal facility.

Question 23: Can PWGSC confirm that the content and level of detail outlined in SOW 9.1 to 9.5 applies to all reports, both in Year 1 and Year 2?

Response 23: Yes, the content and level of detail outlined in SOW 9.1 to 9.5 applies to all reports, both in Year 1 and Year 2.

Question 24: In the response to question 13 states that "DND may issue a task authorization to decommission wells." Does this mean that the costs for decommissioning would be provided after data review and a task authorization would be provided for the additional costs? If you want the costs included in the current pricing where do you want it added and how many wells should we assume are being decommissioned?

Response 24: The Task Authorization to decommission wells could be issued at any time. The costs are not included in the pricing in any of the pricing basis so it would be charged at the cost from your subcontractor as a disbursement.
