

GENERAL NOTES:

1. DRAWINGS ARE NOT TO BE SCALED.
2. ALL DIMENSIONS ARE MEASURED IN METRIC MILLIMETERS.
3. THE GENERAL CONTRACTOR SHALL CHECK AND VERIFY ALL LEVELS, DATA AND DIMENSIONS PRIOR TO COMMENCEMENT OF WORK AND SHALL REPORT ANY DISCREPANCIES AND OMISSIONS.
4. FOR DIMENSIONS OF CONCRETE FOUNDATION WALLS, COLUMNS, & SHEAR WALLS, REFER TO STRUCTURAL DRAWINGS UNLESS NOTED OR SHOWN OTHERWISE.
5. FOR STEEL STUD WALLS, DIMENSIONS ARE TO THE FINISH FACE OF STUDS. FOR CONCRETE WALLS, DIMENSIONS ARE TO THE FACE OF CONCRETE.
6. FOR CRITICAL CLEARANCE DIMENSIONS AT STUD WALLS, DIMENSIONS ARE TO FACE OF GYPSUM BOARD & DIMENSION MARKED CLEAR (CLR).
7. OUTSIDE EDGES OF DOOR FRAMES ARE LOCATED 100mm FROM ADJACENT FINISHED WALL UNLESS NOTED OTHERWISE.
8. ARCHITECTURAL FINISH FLOOR REFERENCE 100 600 EQUALS TOP OF EXISTING FINISHED WAREHOUSE FLOOR.
9. REFER TO REFLECTED CEILING PLANS FOR LOCATION OF BULKHEADS AT CHANGE IN CEILING ELEVATION.
10. REFER TO MECHANICAL DRAWINGS FOR SIZES AND LOCATIONS OF DRAINS, STANDPIPES, INTAKE AND EXHAUST LOUVERS, GRILLES, SMOKE AND FIRE DAMPERS AND ALL RELATED MECHANICAL EQUIPMENT.
11. WALL TYPE ENCLOSING OPENING (IE: DOORS, WINDOWS) ON SIDES TO BE THE SAME WALL TYPE ABOVE & BELOW OPENING UNLESS OTHERWISE NOTED.
12. STUD WALLS EXTENDING TO U/S OF SLAB OR DECK ABOVE ARE TO BE THE FULL WALL ASSEMBLY INCLUDING STUDS, INSULATION, VAPOUR BARRIER AND GYPSUM BOARD. PROVIDE SLIP JOINTS AS APPROPRIATE FOR BUILDING CONDITIONS TO ASTM C754, AND APPLICABLE INDUSTRY STANDARDS.
13. ALL WALLS TO UNDERSIDE OF SLAB OR DECK ABOVE ARE TO HAVE SEALANT ALL AROUND PERIMETER OF WALLS BOTH SIDES AND AROUND ELECTRICAL BOXES AND ALL LINES PENETRATING WALLS.
14. ALL ROOF PENETRATIONS AND SUPPORTS (POSTS, STUDS, RAILS AND OPENINGS) FROM EITHER ARCHITECTURAL, MECHANICAL OR ELECTRICAL DEVICES TO BE CONSTRUCTED WITH MIN. 200mm HIGH PEDESTALS OR PERIMETER CURBS. INSTALL METAL FLASHING OVER CURBS AND SLEEVES AROUND POST.
15. SEAL AROUND ALL PENETRATIONS THROUGH ROOF.
16. SEAL AROUND ALL JOINTS, ELECTRICAL RUNS, PLUMBING, MECHANICAL LINES & DUCTS, AND STRUCTURAL ELEMENTS PENETRATING THROUGH ASSEMBLIES REQUIRED TO ACT AS SMOKE SEPARATIONS.
17. PROVIDE APPROPRIATE FIRESTOPPING AT ALL JOINTS IN RATED ASSEMBLIES AND FIRE SEPARATIONS, AND AROUND ALL PENETRATIONS THROUGH THEM INCLUDING MECHANICAL, ELECTRICAL AND STRUCTURAL. THE FIRESTOPPING MATERIAL/SYSTEM SHALL BE APPROPRIATE FOR EACH SPECIFIC APPLICATION AS TESTED TO THE REQUIREMENTS OF THE LATEST EDITION OF ULC-S101 & ULC-S115, AND IDENTIFIED WITH A ULC LISTED SYSTEM NUMBER, OR A DOCUMENTED ENGINEERING JUDGMENT BY A QUALIFIED PROFESSIONAL.

BUILDING CODE SUMMARY:

DESCRIPTION				
The project involves a new one story warehouse addition and interior alterations to the existing Commercial Building consisting of warehouse and office space.				
APPLICABLE BUILDING CODES				
National Building Code of Canada 2010 - Part 3, as amended by Manitoba Building Code Regulation 31/2011.				
National Fire Code of Canada 2010, as amended by Manitoba Fire Code Regulation 216/2011				
Standard CAN/CSA-B651 - Accessible Design for the Built Environment (not required in staff only areas).				
BUILDING INFORMATION				
Existing Building				
Building Area:	1 082 m ²			
Building Height:	1 storey (7.99 m. above grade)			
Fire Protection:	Sprinklered			
New Addition				
Building Area:	590 m ²			
Building Height:	1 storey (7.99 m. above grade)			
Fire Protection:	Sprinklered			
Combined Building				
Building Area:	1 672 m ²			
Building Height:	1 storey (7.99 m. above grade)			
Fire Protection:	Sprinklered			
Number of Streets:	2 streets			
BUILDING DESIGN SUMMARY				
Section 3.1. - General				
3.1.2. - MAJOR OCCUPANCY CLASSIFICATIONS				
Group D:	Office			
Group F, Division 2:	Warehouse (incl.storage garage)			
Fire separation required: No				
3.1.17. - OCCUPANT LOAD				
	Area (m ²)	Factor (m ²)	Calcul.	Actual
Existing Building				
- Open Offices	216	9.30	23	19
- Private Offices	33	9.30	4	3
- Search/Inspection	47	9.30	5	2
- Waiting	60	n/a	8	8
- Shop	28	4.60	6	2
- Exam Area	355	46.00	8	2
- Storage	106	46.00	2	0
New Addition				
- Commercial Warehouse	590	46.00	13	4
TOTAL			69	40
Section 3.2. - Building Fire Safety				
3.2.2. - BUILDING CLASSIFICATION				
3.2.2.77. - Group F, Division 2, up to 2 Storeys, Sprinklered				
FIRE PROTECTION:	Sprinklered			
BUILDING AREA:	1 Storey: 4 500 m ² 2 Storeys: 1 800 m ²			
CONSTRUCTION TYPE:	Combustible / Non-Combustible			
FLOOR RATING:	45 min. if combustible construction			
SUPPORT ASSEMBLY:	45 min. if combustible construction, or be non-combustible construction			
ROOF ASSEMBLY:	F.R.R. not required per this Article, or per 9.10.8.2.			
3.2.3. - SPATIAL SEPARATION				
All exposing building faces exceed 15m limiting distance and are permitted to have 100% unprotected openings.				
3.2.3.14. - Wall Exposed to Another Wall				
Requirements of this Article do not apply as both fire compartments are within a building that is sprinklered throughout [per Sentence 3.2.3.14.(3)].				
3.2.5. - PROVISIONS FOR FIREFIGHTING				
ACCESS ROUTES:	Provided			
FIRE HYDRANTS:	Provided			
STANDPIPE SYSTEM:	Not required			

Section 3.3. - Safety Within Floor Areas

- 3.3.1. - ALL FLOOR AREAS
- 3.3.1.5. - Egress Doorways
- A minimum of 2 egress doorways are required from rooms with:
 - occupant load exceeding 60, or
 - the travel distance to an egress doorway is more than 25 m., or
 - area of the room or suite is more than 300 m² in Group D
 - area of the room or suite is more than 200 m² in Group F, Div. 2
- 3.3.5. - INDUSTRIAL OCCUPANCY
- The warehouse addition provides for the short term interior parking of a semi-trailer and tractor unit, which would constitute use as a Storage Garage.
- 3.3.5.4. - Repair and Storage Garages
- 1) If access is provided from a storage garage to a stair tower or elevator serving occupancies above the level of the storage garage, the access shall be through a vestibule conforming to Sentence 3.3.5.7.(4) [not less than 1.8 m long, be ventilated, self-closing doors].
- Vestibule 241 is being incorporated for this purpose.

- 3.3.5.6. - Storage Garage Separation
- A storage garage shall be separated from other occupancies by a fire separation with a fire resistance rating not less than 1.5 h.
- The entire warehouse area (existing and addition) are being separated from the remainder of the building by the existing separation partition within the existing building near Gridline A.1, which by nature of its construction is equivalent to at least 1.5 h. The Waiting, Office, Interview, Locker Room and Storage spaces within the warehouse are considered ancillary spaces serving it and are not being separated.

- Section 3.4. - Exits
- 3.4.2. - NUMBER AND LOCATION OF EXITS FROM FLOOR AREAS
- 3.4.2.1. - Minimum Number of Exits
- A floor area in a building not more than 2 storeys in building height, is permitted to be served by at least one exit provided the total occupant load served by the exit is not more than 60, and in a floor that is sprinklered throughout
 - the travel distance is not more than 25 m., and
 - the floor area is not more than 300 m² in Group D
 - area of the room or suite is more than 200 m² in Group F, Div. 2
- Therefore, a minimum of 2 exits is required from each floor area.
- 3.4.2.3. - Distance Between Exits
- The least distance between exits in a floor area shall be one half the maximum diagonal dimension of the floor area, but not less than 9 m.
- 56 m. x 1/2 = 28 m.
- 3.4.2.5. - Location of Exits
- If more than one exit is required from a floor area, the exits shall be located so that the travel distance to at least one exit shall be not more than
 - c) 45 m. in a floor area that contains an occupancy other than a High Hazard Industrial occupancy, provided it is sprinklered throughout.
- 3.4.3. - WIDTH AND HEIGHT OF EXITS
- 3.4.3.2. - Exit Width
- MINIMUM AGGREGATE WIDTH OF REQUIRED EXITS:
 - Exterior doors and ramps: 6.1 mm per person
 - Conforming Stairs: 8.0 mm per person
- MINIMUM WIDTH:
 - Exit Corridors and Passageways: 1100 mm
 - Ramps: 1100 mm
 - Stairs: 900 mm
 - Doorways: 800 mm
- 3.4.4. - FIRE SEPARATION OF EXITS
- 3.4.4.1. - Fire-Resistance Rating of Exit Separations
- 45 min.

- Section 3.7. - Health Requirements
- 3.7.2. - PLUMBING FACILITIES
- 3.7.2.2. - Water Closets
- Universal washrooms are included in female and male water closet counts.
 - Warehouse actual occupant load of 8 persons meets the water closet requirements provided.
 - Note that existing barrier-free washrooms for staff and public use are located in the Commercial Office area. No additional washrooms are being provided.
