

## Overall plan

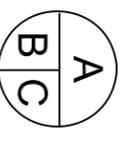

### General information

- Coordinates of the intervention : 45.359019, -73.267110 (near 324 rue Sainte-Thérèse, Saint-Jean-sur-Richelieu, Qc)
- The surfaces of area #1 and #2 are based on satellite images from 2012. Surfaces that may be excavated must be confirmed by Parks Canada at the time of the intervention
- The measures on the plan are indicative in order to allow the contractor to provide a price to Parks Canada.
- The bottom of the canal is contaminated by an accumulation of sediments. It may be difficult to move to the bottom of the canal.
- The Contractor shall provide all necessary measures to enable the Contractor to travel without being bogged down.
- The environmental measures required are presented in the appendices and must be considered for the execution of the works.
- Access to the work area must be via Sainte-Thérèse Street
