**QUESTION 1a:**

Drawing CMTK201

- This appears to be a welded assembly with no insulation. However, the hatch and Instrument door are insulated. Is that correct?

ANSWER 1a:

The assembly is joined in a composite method using some welded joints, through-bolted panels and captive PEM style nuts and some blind rivets.

All joints must be watertight using weld, sealant bedded joint or rubber seal/gasket.

The entire assembly is insulated using 2" thick polystyrene foam board insulation cut into specific shapes. (refer to attached Overview assembly drawing MTK204C)

**QUESTION 1b:**

The components are listed on page 2 in the bill of material, however there are no detail drawings for these. Are these drawings available?

ANSWER 1b:

See attached Overview assembly drawing MTK204C.

**QUESTION 2:**

Drawing CMTK202 and CMTK203

- The components are listed on page 2 in the bill of material, however there are no detail drawings for these. Are these drawings available?

- Hardware items have part numbers, but no manufacturer/ Supplier name. Can this information be provided?

ANSWER 2:

Yes, See attached Overview assembly drawing MTK204C. In general, off the shelf parts are from several suppliers including McMaster-Carr and Sierra Pacific, generic SAE hardware is specified as 316 stainless steel.

**QUESTION 3:**

Are drawings available in SolidWorks, or is there another path or link where we can access more detailed information?

ANSWER 3:

Files will be available in .dxf and .step or .iges formats after contract award.

See attached Overview assembly drawing MTK204C.
