---

Amendment 002 has been raised to provide answers to questions received with regards to this Request for Proposal (RFP).

### **1. Questions and Answers**

Note: Questions may have been modified and/or condensed.

- Q2:** In the RFP, it appears that CBSA is looking to purchase 25 x cards, middleware and support on a 7000 smart card fleet. In the best efforts for this to be priced out accordingly, does CBSA have any other plans to replace or refresh anything further than the 25 being asked for within this RFP?
- A2:** The requirement includes irrevocable options to purchase additional Smart Card Management software licenses, Smart Card Middleware (SafeNet) software licenses, its associated maintenance and support, Smart Cards, and Smart Card Readers/Writer, on an as and when required basis. The quantity for evaluation purposes can be found on page 77 and 78 of the RFP. Please note that these numbers are estimated quantities only and does not represent a commitment on the part of CBSA to purchase goods and services in these amounts.
- Q3:** The RFP mentions that the solution must work with the current CBSA infrastructure. On the Technical Infrastructure section (Appendix C), there is mention about Smart Card Printing: “CBSA has a set template that is used for branding of the Smart Cards. This template is printed onto the Smart Cards with a Fargo HDP 5000 high definition printer. This print process is accomplished by printing a reverse image on the underside of HDP Film, then fusing the film to the Smart Card surface. This makes the image tamper evident – if a counterfeiter tries to peel apart the layers, the image essentially destroys itself.” Should an integration between the card management system and this printer exist?
- A3:** The printer is a stand-alone device and it does not need to be connected to the card management software.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.**
