QUESTIONS AND ANSWER SERIES I

Q1. Can you tell me if there is any flexibility in the dates of the contract completion?

We would not be able to commence work on the aircraft prior to January 6th.

A1. See Amendment below.

Q2. Does the 42 day time period to complete the corrosion inspection allow for defect rectification?

A standard five year corrosion inspection is 685 man hours to disassemble, inspect and reassemble the aircraft and can be completed in the 42 day window, but the 42 days may not allow for defect rectification of significant defects.

A2. See Amendment below.

THIS AMENDMENT IS RAISED TO CHANGE THE SUMMARY AND ANNEX "A", STATEMENT OF WORK. THE FOLLOWING REVISIONS ARE:

1) At 1.2 Summary, DELETE:

"The work must begin prior to January 6, 2017 at the latest. The Contractor will be given 42 days to complete the work, therefore, all work must be completed by February 17, 2017."

AND INSERT:

"The work must begin by January 6, 2017 at the latest. The Contractor will be given until February 17, 2017 to complete the work as described in Annex "A" – Statement of work. Any additional work requiring attention may be given additional time subject to the approval of the technical and contracting authority.

2) At Annex "A" – Statement of Work, DELETE:

"3.0 Objective

The work described is to be carried out in the contractor's secure facility and must be completed within 42 days from the day the aircraft is delivered to the contractor.
The contractor must be able to receive the aircraft at their facility prior to 2017-01-06."

AND INSERT:

"3.0 Objective

The work described is to be carried out in the contractor's secure facility and must be completed

February 17, 2017. The contractor must be able to receive the aircraft at their facility prior to January 6, 2017 and also begin the work by January 6, 2017 at the latest.”

ALL OTHER TERMS AND CONDITIONS OF THE REQUEST FOR PROPOSAL REMAINS UNCHANGED.
