Title: 100 Foot Boom Sprayer

This amendment #001 is raised regarding solicitation 01580-170467/A to:

A. Address a concern regarding Annex "A", Compliance Matrix, item #1.35, on page 14 of 17.

A supplier advised that they believe that this spec can't be met by any sprayer in the industry based on its current wording. Changing a bit of product, putting someone in the cab, putting fuel in, etc. are all variables that can't be controlled and there would be nothing published that they can show this spec is met at 50/50 with all these variables. Industry currently indicates in their published material how close to 50/50 they are. There can be as much as 35% and 66% variance from 50/50 on some units depending on the type of unit. For example, for a sprayer with tolerance/balance/compaction weight: the ratio would be 48-52 % ratio front to back variance from 50/50. This concern is addressed with the amendment described in letter D below.

B. Answer a question as follows:

QUESTION 1:

What is meant by the mandatory specification 1.15 Minimum product tank fill?

ANSWER 1:

There was an omission in the mandatory specification. The correct wording should read "Minimum 3 inch product tank fill." See letter C below.

C. Delete the following in its entirety from Annex "A", Compliance Matrix, on page 12 of 17:

"1.15 Minimum product tank fill"

and replace with:

"1.15 Minimum 3 inch product tank fill"

Please answer the following two questions:

Performance specification met? ____ Yes or ____ No

Where is this shown in your supporting reference material? _____

D. Delete the following in its entirety from Annex "A", Compliance Matrix, on page 14 of 17:

"1.35 50/50 front to rear weigh ratio with tank full and booms totally folded out"

and replace with:

"Between 48:52 and 50:50 front to rear weight ratio with tank full and booms totally folded out"
