This Amendment 005 to the Solicitation is raised to extend the bid closing date and address the following question received from a potential Bidder.

On front page of solicitation:

DELETE:	Solicitation Closes	2016-12-27	02:00PM (PST)
INSERT:	Solicitation Closes	2017-01-06	02:00PM (PST)

QUESTION:

Are we able to build the structure from less components, and fully weld it together instead of rivets and such?

ANSWER:

A welded assembly is acceptable as long as it conforms to the overall assembly as set out in Annex "A", and maintains the form, fit and function of the complete assembly and all components.

The kiosk is intended to be installed in various locations (in particular at mountain top seismic stations) to contain seismic equipment, power supplies, communications equipment, batteries, and related systems. The kiosk must provide a weatherproof and secure enclosure for these systems. The bidder is required to supply a complete assembled unit as per the drawings of Appendix 1 to Annex "A". Natural Resources Canada will source and install the subsidiary components and transport the kiosk to its final location.

The bidder is free to replace riveted/bolted components with welded ones should that be more effective for them. The bidder is further free to consolidate components into a fewer number of parts. However, any such modifications must be done in such a manner that the overall size, shape, and function of the kiosk as expressed by the intent given above is not changed. In particular: the dimensions of the kiosk (e.g. inside, outside, door, panel, and other openings) must not be changed, the mechanical strength of the overall assembly must not be weakened, the operation of moving parts (doors etc.) must remain as per the original design.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
